About Cedars-Sinai Marina del Rey Hospital

Cedars-Sinai Marina del Rey Hospital (CSMH)¹, a California nonprofit public benefit corporation, is a fully accredited 103-bed nonprofit community hospital. The hospital delivers high quality, safe and effective care in a convenient, patient-centered setting. It provides a range of clinical services aimed at meeting the needs of the communities it serves. It has established areas of expertise in spine, orthopedics, weight management, and minimally invasive surgery. The hospital has a thriving emergency department highly valued as a community resource.

CSMH has over 4,000 annual admissions and nearly 50,000 emergency visits annually, with over 800 full-time employees and over 500 physicians on medical staff.

Mission

As a leading academic healthcare organization, our mission is to elevate the health status of the communities we serve.

- We deliver exceptional health care enhanced by research and education.
- We prioritize high-quality care for all with equity and compassion.
- We transform biomedical discoveries and innovations for better health.
- We educate tomorrow's physicians, nurses, and healthcare professionals.

Our mission is founded in the Judaic tradition, which inspires our devotion to the art and science of healing.

For over 50 years, since its founding in 1969, the hospital has served as a critical health care resource for Marina del Rey and the surrounding communities. Today, CSMH is deepening that community commitment by adding new and enhanced services and programs as well as the construction of a new hospital. The new hospital will feature an expanded emergency department, state-of-the-art operating rooms, cardiac catheterization and gastroenterology labs, and interventional procedure suites to handle the most complex cases. The new nine-story hospital will feature 160 beds. The current hospital will remain open and fully operational during construction, which is expected to be completed in 2026.

CSMH has been recognized with six “High-Performing” designations in U.S. News & World Report’s “Best Hospitals 2025-26” rankings, including in exceptional care across key specialties and conditions like Orthopedics, Back Surgery (Spinal Fusion), Heart Failure, Diabetes, Hip Fracture and Pneumonia.

¹ Cedars-Sinai Marina Hospital was formerly known as CSHS Holdings, Inc., dba Cedars-Sinai Marina del Rey Hospital.

Governance

The CSMH Board of Directors provides organizational leadership in fostering the commitment to Community Benefit. The Board of Directors functions as an oversight and policy-making body for the hospital's Community Benefit commitments, efforts and strategic alignment with community needs. The CSMH Board of Directors has accountability for Community Benefit performance. It oversees and guides Community Benefit decision making.

Caring for the Community

As an integral part of the Los Angeles community, our work goes beyond the walls of our facilities. We join with community organizations to increase access to services for those who are historically marginalized and underserved – including people experiencing homelessness. We also provide critically needed grant-funding to service providers.

Service Area

CSMH is located at 4650 Lincoln Blvd., Marina del Rey, California 90292. The hospital's service area is in Los Angeles Service Planning Area (SPA) 5 – West - and encompasses eight ZIP Codes in the cities of Culver City, Mar Vista, Marina del Rey, Playa del Rey, Playa Vista, Santa Monica, Venice and Westchester.

Culver City 90230	Playa Vista 90094
Mar Vista 90066	Santa Monica 90405
Marina del Rey 90292	Venice 90291
Playa del Rey 90293	Westchester/L.A. 90045

Hospital Population Characteristics: Total Population = 230,039	
Gender	Percent
Female	51.8%
Male	48.2%
Race/Ethnicity	Percent
White, non-Hispanic	53.7%
Hispanic or Latino	19.8%
Asian, non-Hispanic	12.9%
Multiracial, non-Hispanic	6.4%
Black or African American, non-Hispanic	6.1%
Some other race, non-Hispanic	0.8%
American Indian or Alaska Native, non-Hispanic	0.2%
Native Hawaiian or Pacific Islander, non-Hispanic	0.1%
Age	Percent
Less than 18 years	15.6%
18 - 64	68.9%
65+	15.6%
Socioeconomic Status	Percent
Residents living below 100% of the federal poverty level (FPL)	8.4%
Residents living below 200% of the federal poverty level (FPL)	17.9%

Community Health Needs Assessment: 2025-2028

CSMH completed a Community Health Needs Assessment (CHNA) in 2025 as required by state and federal law. CSMH participated in a collaborative process for the CHNA in partnership with Cedars-Sinai Medical Center, Providence Saint John's Health Center, Ronald Reagan UCLA Medical Center, UCLA Medical Center, Santa Monica and Resnick Neuropsychiatric Hospital at UCLA.

The CHNA is a primary tool used by CSMH to determine its Community Benefit Plan, which outlines how it will give back to the community in the form of health care and other community services to address unmet community health needs. The assessment incorporated components of primary data collection and secondary data analysis that focused on the health and social needs of the service area.

The CHNA examined up-to-date data sources for the service area to present community demographics, social determinants of health, health care access, birth characteristics, leading causes of death, acute and chronic disease, health behaviors, mental health, substance use and misuse and preventive practices. When applicable, these data sets were presented in the context of California and compared to Healthy People 2030 objectives.

CSMH conducted targeted interviews with individuals who represent the broad interests of the community served by the hospital. Leaders and/or representatives of medically underserved, low-income, and BIPOC populations, local health or other departments or agencies that have current data or other information relevant to the health needs of the community were represented in the sample. Input was obtained from representatives of Los Angeles County Department of Public Health.

The complete CHNA report and the prioritized health needs can be accessed at www.marinahospital.com/community.

Feedback is welcome on the CHNA and Implementation Strategy. Please send feedback to: groupcommunitybenefit@cshs.org.

Community Benefit Activities to Address Priority Health Needs

Community Benefit promotes health and healing and is focused on addressing the identified health needs in the community. For a program or service to be considered a Community Benefit, it must improve access to health care, enhance the health of the community, advance medical or healthcare knowledge or reduce the burden of government or other nonprofit community efforts.

In FY25, CSMH engaged in activities and programs that addressed the Health Focus Areas prioritized from the identified health needs in the previous CHNA (2022-2025). The program highlights included in this section reference CSMH's 2022-2025 Implementation Strategy commitments.

In the 2022-2025 Implementation Strategy, Cedars-Sinai Marina Hospital committed to Community Benefit efforts that address:

1. Access to Health Care and Community Services
2. People Experiencing Homelessness

Selected activities and programs that highlight CSMH's commitment to the community are detailed below.

Access to Health Care and Community Services

Community Benefit efforts focus on programs, partnerships and strategies that increase access to primary care, preventive care and access to mental health care services.

Goal: Increase access to health care and improve the health of historically marginalized and underserved individuals in our community.

Objectives: Increase availability and access to health care services; Increase community-based behavioral health services for vulnerable populations; and Improve access to community services that address the social determinants of health.

Community Connect Program

Through assessment and interventions that help people who experience vulnerabilities based on their social determinants of health, CSMH connects patients to the resources they need. The program serves patients across the health system.

- Assessment tools identify health related social needs such as housing instability, utility needs, transportation needs, food insecurity, social isolation, interpersonal violence,

mental health and substance abuse, depression, independent living, access to care and health literacy.

- This past year, CSMH drastically scaled up screening ensuring that the health-related social needs of every adult patient discharging from the hospital can be identified and addressed.
 - In FY25, CSMH screened 3,499 adult patients and provided referral information to over 300 patients.
- A shared electronic referral platform called Cedars-Sinai Community Resource (CSCR) streamlines referral pathways, improves coordination, and improves access to vital community resources for patients and the community.

Community Health Improvement Access to Care Programs (In partnership with Cedars-Sinai Medical Center²),

Cedars-Sinai Medical Center operated Community Benefit programs in multiple sites in the CSMH service area. These programs included Community Health Improvement, Share & Care, Team HEAL and grantmaking.

Financial Assistance and Health Insurance Enrollment

CSMH provided financial assistance, through free and discounted care and government health programs, for low-income patients for healthcare services. CSMH's financial assistance policy can be accessed, if eligibility criteria are met, by people who earn up to 400% of the federal poverty level and significantly discounted care to those who earn up to 600% of the federal poverty level. While more people have access to insurance coverage through the Affordable Care Act and Covered California, many commercial insurance plans carry a high deductible or copay causing financial hardship for patients. Expanded eligibility criteria for free or discounted care enables more people to receive financial assistance. In addition, assistance is provided to enroll low-income persons in health insurance programs. Information on Cedars-Sinai Marina Hospital's financial assistance policy is available on the Cedars-Sinai Medical Center website, including the application form and contact information.

Health Care and Supportive Services

Support services were provided for long-term care, transportation, clothing, home infusion services and prescriptions for patients in need.

² Cedars-Sinai Medical Center is the sole member (as that term is defined in California Corporations Code 5056) of CSMH.

Psychiatric Care

CSMH financially supported inpatient mental health care for vulnerable patients needing mental health hospitalization. Psychiatric care was provided to 70 patients with limited access to care who were transported to a medically necessary inpatient mental health care bed.

People Experiencing Homelessness

Community Benefit efforts focus on programs, partnership and strategies that increase access to primary care, mental health care, substance abuse services and community-based health care services for persons experiencing homelessness.

Goal: Improve the health of people experiencing homelessness; and Connect people experiencing homelessness with needed community resources.

Objectives: Increase access to health care services, behavioral health and community-based services that address the social determinants of health for people experiencing homelessness.

Healthcare and Supportive Services

Support services were provided for recuperative care, long-term care, transportation, clothing, home infusion services, prescriptions and direct referrals for patients experiencing homelessness.

Healthcare in Action

CSMH contracts with Healthcare in Action to extend health care services beyond the walls of the hospital through an innovative “street medicine” approach focused on providing extra care and support to patients experiencing homelessness. In FY25, CSMH made 18 referrals into the Healthcare in Action program.

Homeless Patient Navigator (Community Resource Coordinator or CRC)

One and a half (1.5 FTE) Community Resource Coordinators are dedicated to patients experiencing homelessness. In FY25 the CSMH CRCs served 679 individuals. While each patient faces different and unique challenges, common themes emerged, such as housing and food insecurity, psychiatric and substance use-related illnesses, and a general difficulty accessing support in the community. The CSMH CRCs assisted persons experiencing homelessness to enter detox programs, find temporary and more permanent shelter and obtain prescription medications they needed but would otherwise not be able to fill themselves. In addition, persons experiencing homelessness were helped to obtain appointments with mental health and primary care providers.

Shelter Beds

CSMH connects people experiencing homelessness to local shelters as part of the comprehensive care provision. Shelter beds are accompanied by wrap-around case management services, with

the goal of connecting people experiencing homelessness with long-term permanent supportive housing.

FY25 CSMH Grantmaking

The Cedars-Sinai Medical Center’s Community Benefit Giving Office supported five organizations serving the Marina del Rey geographic service area with \$200,000 in grant funding supporting access to care and services, people experiencing homelessness and economically marginalized community members, focused on challenging areas of need.

Funded Community Organization	Project
Access to Care and Services: Mar Vista Family Center	In support of the Health and Wellness Program to promote healthy lifestyles by providing culturally fluent information, resources and services to local community members.
Access to Care and Services: Westchester Family YMCA	In support of the Center for Community Well Being, which meets critical needs for underserved communities through expanded, integrated support services including mental health, food distribution, and fire relief.
People Experiencing Homelessness: Healthcare in Action	In support of the organization’s street medicine outreach to deliver immediate healthcare services to unhoused people in the Marina del Rey area, while also facilitating access to longer-term resources such as housing, ongoing medical care, substance abuse, and mental health support.
People Experiencing Homelessness: Safe Place for Youth	In support of the Meals Program for youth experiencing homelessness or housing insecurity, which provides free, nutritious meals and connects youth to SPY’s broader continuum of health, mental health and supportive services.
People Experiencing Homelessness: St. Joseph Center	In support of the Bread and Roses Food Assistance Programs to increase food security and provide supportive services for people experiencing homelessness and low-income individuals and families on the Westside of Los Angeles.

Grantmaking (In Partnership with Cedars-Sinai Medical Center),

Cedars-Sinai leverages resources that improve community health in the CSMH service area. In FY25, Cedars-Sinai Medical Center contributed Community Benefit resources that were focused on the CSMH geography. \$5,085,000 in grantmaking was strategic to the geography and addressed CHNA-identified needs including access to quality and equitable health care and behavioral health

services through Federally Qualified Health Centers and behavioral health organizations important to the CSMH community; navigation and service provision for people experiencing homelessness; and capacity building for community-based organizations focused on food security, economic stability, housing and more.

Other Community Benefit Services

CSMH provided Community Benefit services in addition to those programs focused on addressing priority health needs.

Community Benefit Operations

In FY25, Community Benefit operations were provided that included direct and indirect costs associated with assigned staff, Community Benefit planning, tracking, reporting, evaluation and operations.

Community Benefit Financial Commitment

Cedars-Sinai Marina del Rey Hospital provides programs and activities that mostly serve persons who are beneficiaries of Medi-Cal, and county, state, and federal programs for which the costs of providing the services are not fully reimbursed. The costs for these programs are calculated using a cost to charge ratio for any unreimbursed services. Also included are activities that improve the community's health status and educate or provide social services to persons who are historically underserved. The costs for these activities are calculated by adding the direct costs and allocated overhead costs, offset by any donations and grants received.

For a detailed table of CSMH's Community Benefit financial commitments: Vulnerable Populations and Broader Community, **see Appendix A**. For a detailed table of programs by Vulnerable Populations and Broader Community, **see Appendix B**.

CSMH Community Benefit Financial Commitment, July 1, 2024 – June 30, 2025

Community Benefit Financial Categories	Net Benefit
Unreimbursed Cost of Direct Medical Care for the Poor and Underserved (Excludes the unreimbursed cost of caring for Medicare patients) Charity care and uncompensated care for the uninsured: \$ 8,780,000 Unreimbursed cost: caring for Medi-Cal patients: \$15,741,000	\$24,521,000
Unreimbursed Cost of Specialty Government Programs	\$216,000
Community Benefit Programs, including Community Health Improvement Services, Charitable Donations and Community Benefit Operations	\$4,549,000
Total Community Benefit Excluding Unpaid Cost of Direct Medical Care for Medicare Patients	\$29,286,000
Unreimbursed Cost of Direct Medical Care for Medicare Patients	\$25,630,000
Total Community Benefit	\$54,916,000

Community Benefit Plan FY26

CSMH will implement Community Benefit programs and activities in FY26 according to the needs prioritized in the 2025-2028 CHNA and Implementation Strategy. The health needs were prioritized with the help of community stakeholders through the CHNA process. For a list of community stakeholders who engaged in the health needs prioritization process, **see Appendix C.**

Health Focus Areas:

1. Access to Healthcare and Community Services
2. Housing Insecurity and Homelessness

Access to Healthcare and Community Services: Behavioral Health and Social Drivers of Health Services

Goal: Increase access to healthcare and improve the health of historically marginalized and under-resourced individuals and families in CSMH's service area, with a special focus on programs, partnerships and strategies that increase access to healthcare, behavioral health and social drivers of health services.

Objectives/Anticipated Impacts: Increased availability and access to healthcare and community services focused on under-resourced communities, including, but not limited to, increased connections to community-based services to address healthcare access and health-related social needs rooted in social drivers of health.

Access to Healthcare and Community Services: Programs and Strategies	
Case Management and Social Work	CSMH will continue to provide patients with socioeconomic needs with resources to facilitate access to primary care, outpatient care and to community services that address the social drivers of health.
Cedars-Sinai Community Resource (CSCR)	CSMH social workers and staff will continue to use CSCR, an electronic community resource referral platform powered by <i>FindHelp</i> , to navigate patients to needed community services. Additionally, CSCR will continue to be available to patients and community members through a public-facing website, providing information on how to connect to needed resources. Thousands of community searches have been logged on CSCR, showing how important this resource is to navigate and access services.
Community Health Improvement (In Partnership with Cedars-Sinai Medical Center)	Cedars-Sinai Medical Center's Community Health Improvement (CHI) will continue to provide health education and screenings, fitness and wellbeing curriculums, flu vaccines, as well as immunization programs for children, families and older adults – all free to the public – elevating health literacy and ensuring participants have access to ongoing care in neighborhoods surrounding CSMH.
Financial Assistance and Health Insurance Enrollment	CSMH will continue to provide free care to people who earn up to 400% of the federal poverty level and discounted care to those who earn up to 600% of the federal poverty level. Eligibility criteria for free or discounted care will enable more people to receive financial assistance.

Access to Healthcare and Community Services: Programs and Strategies

Grantmaking (In Partnership with Cedars-Sinai Medical Center) Recognizing the critical role of community-based services in promoting access to high-quality care for populations that are historically underserved, Cedars-Sinai Medical Center will continue to provide grants as a strategy for increasing access to care and addressing mental health care in the community.

Psychiatric Patient Support For patients who need additional care outside of CSMH, CSMH will continue to provide telehealth psychiatric consults through ongoing partnerships for psychiatric and behavioral health services.

Share & Care (In Partnership with Cedars-Sinai Medical Center) Cedars-Sinai Medical Center's Share & Care program will continue to offer programs and trainings for children, teachers, parents and school principals, facilitated by licensed mental health practitioners, that enhance at-risk children's ability to learn in the classroom, change destructive behaviors and envision a brighter future. Share & Care counselors will continue to facilitate 10-week group art-therapy programs that provide a therapeutic environment to improve students' abilities to cope with trauma, loss and grief, self-esteem, bullying, socialization, anger management, divorce, shyness, incarcerated parents and substance abuse. Share & Care partners with 20+ LAUSD schools, including schools in neighborhoods surrounding CSMH.

Social Drivers of Health (SDOH) Screening CSMH will continue to screen patients for social drivers of health, with active analysis of SDOH screening data and partnership-building to meet patient health-related social needs.

Housing Insecurity and Homelessness

Goal: Improve healthcare delivery to people experiencing homelessness and connect people experiencing homelessness with needed community services and resources.

Objectives/Anticipated Impacts: Increased availability and access to healthcare and community services focused on housing insecure individuals, families and communities and people experiencing homelessness, including, but not limited to, increased connections to community-based services to address the specific needs of these populations.

Housing Insecurity and Homelessness: Programs and Strategies

Grantmaking: Housing Insecurity and Homelessness CSMH will continue to provide grant support to community service agencies that address the multiple health and social needs of people experiencing homelessness. Additional grantmaking in housing insecurity and homelessness will continue to be implemented in partnership with Cedars-Sinai Medical Center.

Healthcare in Action (In Partnership with Cedars-Sinai Medical Center) Cedars-Sinai Medical Center will continue to contract with Healthcare in Action to extend health care services beyond the walls of the medical center through an innovative street medicine approach focused on providing extra care and support to patients experiencing homelessness.

Patient Navigation CSMH will continue to implement intensive case management in the Emergency Department (ED) to improve access to community-based services for people experiencing homelessness. Managed by the Emergency Department, Social Work and Nursing teams, patient navigators assist patients in enrolling in public and private health insurance and connecting them to needed social and medical care resources.

Housing Insecurity and Homelessness: Programs and Strategies

Recuperative Care CSMH will continue to support patients requiring additional assistance post-discharge who are experiencing homelessness and lack a place to recover. Recuperative Care facilities are designed to help care for patients and to connect them into programs, including the Coordinated Entry System (CES), so they can receive government benefits and be screened and rated to become eligible for longer-term housing solutions.

Health Needs the Hospital Will Not Address

There were health needs identified in the CHNA that did not meet the criteria for developing and implementing a Health Focus Area. This is not intended to minimize the importance of those health needs and does not preclude CSMH from potential efforts and investments in these issue areas as a response to emerging needs in the community. The health needs identified in the CHNA, but not included in the Health Focus Areas for the 2025-2028 Implementation Strategy are: chronic diseases, community safety, COVID-19, economic insecurity and environmental conditions. CSMH will continue to develop partnerships and seek opportunities to address community needs where we can make a meaningful contribution.

Program Evaluation

CSMH's reporting process includes the collection and documentation of program measures and collaborative efforts to address health needs. An evaluation of the impact of CSMH's actions to address these significant health needs will be reported in the next scheduled CHNA.
