1. Introduction

a. Kaiser Permanente's Mission Statement

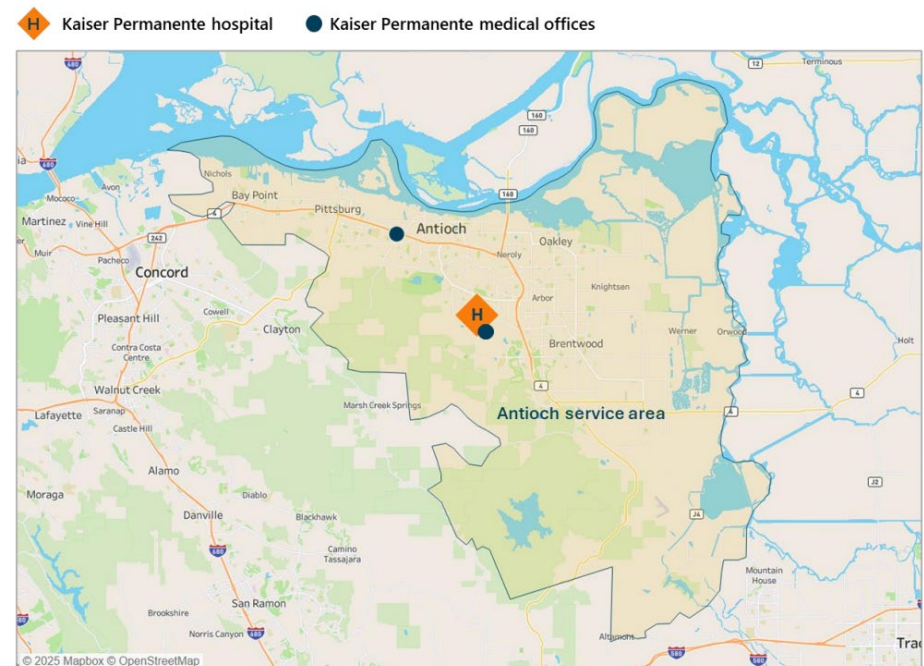

Kaiser Permanente is an integrated health care delivery system comprised of Kaiser Foundation Hospitals, Kaiser Foundation Health Plan, and physicians in the Permanente Medical Groups. We are recognized as one of America's leading health care providers and nonprofit health plans.

Founded in 1945, Kaiser Permanente has a mission to provide high-quality, affordable health care services and to improve the health of our members and the communities we serve. We currently serve nearly 12.6 million members in 8 states and the District of Columbia.

Care for members and patients is focused on their total health and guided by their personal Permanente Medical Group physicians, specialists, and team of caregivers. Our expert and caring medical teams are empowered and supported by industry-leading technology advances and tools for health promotion, disease prevention, state-of-the-art care delivery, and world-class chronic disease management. Kaiser Permanente is dedicated to care innovations, clinical research, health education, and the support of community health.

b. Definition of the Community

Kaiser Permanente defines the community served by a hospital as those individuals residing within its hospital service area. The Kaiser Permanente Antioch Medical Center hospital service area includes residents in a defined geographic area surrounding the hospital and does not exclude low-income or underserved populations.

2. Community Health Needs Assessment (CHNA)

a. Approach to CHNA

Every three years Kaiser Permanente Antioch Medical Center conducts a community health needs assessment (CHNA). The CHNA process is driven by Kaiser Permanente's commitment to improve health equity and is intended to be transparent, rigorous, and collaborative. Our Community Health team has identified and prioritized needs unique to our service area, based on community-level quantitative data and input from those who represent the broad interests of the community. We prioritize health equity in our CHNA process — including the data collection and analysis stages — and we are committed to gathering community perspectives on the impact of social health factors and health disparities. To meet this commitment, we engage with other hospitals, public health, and community organizations committed to advancing health for vulnerable populations.

To view or download the Kaiser Permanente Antioch Medical Center CHNA report and three-year Implementation Strategy (IS), please refer to Kaiser Permanente Community Health Needs Assessments (<https://www.kp.org/chna>). The IS also will be filed with the Internal Revenue Service using Form 990, Schedule H.3.

b. Community Engagement in Development of the Plan

Kaiser Permanente's approach to CHNA prioritizes collecting qualitative data primarily through key informant interviews with individuals representing the broad interests of the community, including expertise in public health and knowledge about challenges affecting those disadvantaged by their social or economic status, geographic location, and environment. The key informant selection process aims to represent a range of community voices across all populations in that community, especially vulnerable populations. In the most recent CHNA process key informants included leaders from organizations representing local, state, and/or tribal public health, key sectors engaged in solutions (e.g., housing, economic opportunity), and those serving specific communities (e.g., people with disabilities, people who are unhoused).

As part of the CHNA process, Kaiser Permanente considers both quantitative and qualitative data to inform the prioritization of health needs for a community. Community voice through qualitative data is weighed highly in the prioritization process, above quantitative measures. In addition, Kaiser Permanente is committed to partnering with hospitals, local and tribal public health agencies, and community organizations to understand needs and advance health and health equity in the communities we serve.

Kaiser Permanente also developed a free, web-based data platform that provides access to a core set of 85 publicly available indicators using the County Health Rankings population health framework, which emphasizes social and environmental determinants

of health. The public is able to view and download information from the [Community Health data platform \(https://public.tableau.com/app/profile/kp.chna.data.platform/viz/2025CommunityHealthNeedsDashboard/1a_StartHere\)](https://public.tableau.com/app/profile/kp.chna.data.platform/viz/2025CommunityHealthNeedsDashboard/1a_StartHere).

Hospitals that collaborated on the CHNA: John Muir Health, Sutter Delta Medical Center, University of California — San Francisco Benioff Children's Hospital, Kaiser Permanente Walnut Creek Medical Center, Kaiser Permanente Richmond Medical Center.

Other organizations that collaborated on the CHNA: Public health agencies: Contra Costa Health; Other organizations: Actionable Insights LLC.

For a full list of consulted community stakeholders, refer to Appendix B. Community Input of the 2025 CHNA.

c. List of Prioritized Needs

In the 2022 Implementation Strategies, Kaiser Permanente Antioch Medical Center prioritized the following significant health needs, in priority order:

1. Income & employment: Economic opportunity provides individuals with jobs, income, a sense of purpose, and opportunities to improve their economic circumstances over time. Residents in the Antioch service area experience a higher unemployment rate and include more students eligible for free and reduced-price lunch than both the state and nation. Disparities exist in the percentage of students eligible for free and reduced-price lunches, with rates higher in ZIP codes that tend to have higher vulnerable populations. The relatively high prevalence of children living in poverty disproportionately impacts vulnerable populations. Access to jobs, rated through a measure called 'job proximity', is worse than the state rate and is a challenge experienced across diverse communities. Key informants noted there are few job opportunities in the Antioch service area causing people to commute out of Contra Costa County for employment and the local jobs are typically low wage, with no opportunity for advancement.

2. Mental & behavioral health: Mental health affects all areas of life, including a person's physical well-being, ability to work and perform well in school and to participate fully in family and community activities. Mental and behavioral health outcomes for residents of the Antioch service area present a critical and urgent need, exacerbated by the COVID-19 pandemic. Rates for some of the most severe indicators of mental and behavioral health, including suicide and opioid overdose death, are higher for the Antioch service area compared to the rest of Contra Costa County. Deaths of despair—a measure that combines death rates of suicide, alcohol-related disease, and drug overdose—are highest among vulnerable populations in the Antioch service area compared with the service area in general. Vulnerable populations of the Antioch service area experience the highest rates of suicide and opioid

overdose death compared to any population in the service area for which data are available. Key informants noted the need for mental health services for issues like depression and anxiety were exacerbated by COVID-19, especially during the shelter-in-place order and for youth, seniors, and those in the LGBTQ community. Informants also noted a limited number of therapists in the Antioch service area and the surrounding areas and that it is especially hard to find bilingual/bicultural therapists.

3. Access to care: Access to comprehensive, quality health care services — including having insurance, local care options, and a usual source of care — is important for ensuring quality of life for everyone. Despite having more insured residents and more physicians and dentists compared with the state within Contra Costa County, which contains the Antioch service area, outcomes on indicators such as insurance rates for children and infant mortality for the Antioch service area show access to care is a significant need. Neighborhoods in the northwest region of the Antioch service area, with relatively higher rates of diverse communities, experience the highest rates of uninsured children in the Antioch service area. Key informants shared many barriers to accessing care including few local clinics, the Contra Costa County hospital not nearby, no coordinated, efficient transportation, and health care providers not mirroring the community culturally or linguistically and not practicing cultural humility.

d. Health Needs Identified but Not Addressed

The significant health need identified in the 2022 CHNA that Kaiser Permanente Antioch Medical Center does not plan to address is shown below, along with the reasons for not addressing that need.

Reasons Housing was not selected:

- Less feasibility to make an impact on this need
- Less ability for Kaiser Permanente to leverage expertise or assets to address this need
- This need is incorporated into other needs selected

For information about the process and criteria used to select these health needs and the health needs that were not selected (and the rationale), please review the [2022 CHNA Report and the 2023-2025 Implementation Strategy Report](http://www.kp.org/chna) (<http://www.kp.org/chna>).

e. Activities Taken to Address the Needs of the Community

The following are the health needs Kaiser Permanente Antioch Medical Center were addressed during the 2023-2025 Implementation Strategy period.

All Kaiser Foundation Hospitals planned for and drew on a broad array of resources and strategies to improve the health of our communities. Resources and strategies deployed to address the identified health needs of communities include grantmaking, in-kind resources, and collaborations with community-based organizations such as local health departments and other hospital systems. Kaiser Permanente also leverages internal programs such as Medicaid, charitable health coverage, medical financial assistance, health professional education, and research to address needs prioritized in communities. Grants to community-based organizations are a key part of the contributions Kaiser Permanente makes each year to address identified health needs, and we prioritize work intended to reduce health disparities and improve health equity. In addition to contributing financial resources, we leveraged assets from across Kaiser Permanente to help us achieve our mission to improve the health of communities. The table below highlights a partial list of key grantmaking, collaborations, and partnership activities undertaken in 2025 to address community needs identified in the 2023–2025 Implementation Strategy period. Refer to the table in the Financial Summary section for financial investments made towards addressing the prioritized community needs. Additionally, Kaiser Permanente NCAL provided significant contributions to the East Bay Community Foundation (EBCF) in the interest of funding effective long-term, strategic community benefit initiatives. These EBCF-managed funds are not included in the financial totals for 2025.

Income and employment			
Name of Community Partner	Title of Grant/Partnership	Service Areas Impacted	Description
Opportunity Junction, Inc.	Healthcare Career Training for Quality Jobs	Antioch	Opportunity Junction delivered free, intensive job training in Certified Nursing Assistant and Medical Assistant tracks to unemployed and underemployed individuals in Contra Costa County, equipping low-income community members with the skills, certifications, and wraparound support needed to launch stable healthcare careers while directly addressing the region's critical shortage of entry-level healthcare workers and creating pathways to financial security for those facing the greatest barriers to employment.
Food Bank of Contra Costa and Solano	Equitable Access to Healthy Food Distribution in Contra Costa and Solano	Antioch; Walnut Creek	The Food Bank of Contra Costa and Solano distributed fresh produce, proteins, dairy, and shelf-stable food at no cost to food insecure individuals across Contra Costa and Solano

			Counties while expanding into underserved communities with limited access to food assistance, alleviating economic stress for working families and connecting individuals to public benefits that support long-term stability and improved health outcomes.
White Pony Express	Food Rescue Program/Nutrition Security	Antioch; Walnut Creek	White Pony Express rescued, curated, and delivered high-quality surplus food free of charge to vulnerable and food insecure residents across Contra Costa County seven days a week, addressing hunger as both a health and equity issue for low-income and historically marginalized communities.
Meals on Wheels of Contra Costa, Inc.	Meals for homebound seniors	Antioch; Walnut Creek	Meals on Wheels Contra Costa ensured that homebound seniors aged 60 and older across Contra Costa County received nutritious meals at no cost by subsidizing meal procurement, strengthening partnerships with local service providers, and filling the critical funding gap left by government sources, meeting the rising demand driven by a rapidly growing senior population facing barriers to daily nutrition.
Muir Heritage Land Trust	Family Harvest Farm – Youth Employment, Leadership and Health Through Food and Farming	Antioch	Family Harvest Farm connected transition-age foster youth in Contra Costa County to paid agricultural apprenticeships rooted in sustainable farming, mentorship, and workforce readiness education while simultaneously distributing thousands of pounds of free, organic produce to underinvested communities in the Pittsburg area, creating a dual-impact model that built pathways to economic self-sufficiency for youth aging out of the foster care system while strengthening food access in a USDA-designated food desert.

Support for Actively Rising Youth	The Contra Costa Firefighter Youth Academy	Antioch	Contra Costa Firefighter Youth Academy provided underserved teenagers in the Diablo service area with mentoring, career exploration, and hands-on training in fire science, CPR, first aid, and disaster preparedness, equipping youth from socioeconomically challenged communities with the skills, structure, and guidance needed to become community safety ambassadors and explore pathways into first responder careers.
-----------------------------------	--	---------	--

Mental and behavioral health			
Name of Community Partner	Title of Grant/Partnership	Service Areas Impacted	Description
Antioch Unified School District	Mental Health and Wellness Initiative	Antioch	Antioch Unified School District implemented a Mental Health and Wellness Initiative that brought trauma-informed training, coaching, and Wellness Room support to staff and caregivers across the district through a dedicated trauma educator consultant, directly responding to identified community mental and behavioral health needs and building the capacity of school communities to create healthier, more supportive learning environments for students, staff, and families.
Mindful Life Project	Mindfulness-Based Mental and Behavioral Health Programming for Title I Schools in Antioch Unified School District	Antioch	Mindful Life Project placed full-time, in-person coaches across partner schools in the Antioch Unified School District to deliver trauma-informed, mindfulness-based programming to students, educators, and families, building social-emotional skills and whole-school wellness in communities where students of color, low-income families, and English

			language learners face the greatest unmet mental health need.
Contra Costa Interfaith Transitional Housing, Inc.	Hope Solutions Trauma-Informed Mental Health Support Services for Housing Clients	Antioch	Hope Solutions delivered on-site mental health support, case management, and trauma-informed services to individuals, families, and youth who had experienced homelessness, breaking the intergenerational cycles of poverty, trauma, and mental illness across Contra Costa County by pairing permanent housing with comprehensive, holistic care that addressed both immediate needs and long-term well-being.
STAND! For Families Free of Violence	Reaching Domestic Violence Victims at the Margins - saving lives and improving health outcomes	Antioch	STAND! For Families Free of Violence reached the most marginalized domestic violence survivors in Contra Costa County through expanded outreach and strengthened partner referrals, delivering immediate, comprehensive advocacy services that addressed both urgent safety needs and the long-term physical, emotional, and economic health impacts of domestic violence.

Access to care			
Name of Community Partner	Title of Grant/Partnership	Service Areas Impacted	Description
Hijas del Campo	Hijas del Campo Equidad de Salud Program	Antioch	Hijas del Campo's Equidad de Salud Program delivered culturally and linguistically competent healthcare outreach, insurance enrollment assistance, and health education directly to families in Contra Costa County, addressing the significant health disparities, chronic conditions, and systemic barriers that prevent one of California's most vulnerable and underserved populations from accessing the care they need.

<p>Planned Parenthood: Shasta-Diablo, Inc.</p>	<p>Bridging Gaps to Care: Planned Parenthood Northern California's Community Health Initiatives in Contra Costa County</p>	<p>Antioch; Walnut Creek</p>	<p>PPNorCal's Community Health Worker Program will provide holistic support to residents throughout Contra Costa County by offering a comprehensive approach to culturally appropriate reproductive health care, community-based outreach, and wraparound support for patients at PPNorCal's Concord Health Center.</p>
<p>District Council Contra Costa County Society of St. Vincent de Paul dba St. Vincent de Paul of Contra Costa</p>	<p>Core Support for RotaCare Pittsburg Free Medical Clinic at St. Vincent de Paul</p>	<p>Antioch</p>	<p>St. Vincent de Paul of Contra Costa County strengthened the healthcare safety net for uninsured, low-income residents of East Contra Costa County by delivering free primary medical care, prescriptions, lab and diagnostic services, specialty referrals, and bilingual chronic disease education, reducing reliance on emergency rooms and alleviating the financial burden of untreated conditions for a community where approximately 12,000 adults remain without health insurance.</p>
<p>United Latino Voices of Contra Costa County</p>	<p>Staying Strong, Staying Healthy for our Children and Families</p>	<p>Antioch</p>	<p>Through weekly community outreach, health education, and hands-on enrollment assistance, United Latino Voices of Contra Costa County connected low and very low income residents across Bay Point, Pittsburg, Antioch, Brentwood, Oakley, and Concord to Medi-Cal, community health programs, and other coverage options, ensuring that families and vulnerable community members could access and maintain healthcare coverage during a time of heightened economic uncertainty and fear.</p>
<p>Choice in Aging</p>	<p>Adult Day Health Care Movement and Fall Prevention Support</p>	<p>Antioch; Walnut Creek</p>	<p>As the only remaining licensed Adult Day Health Care facility in the East Bay, Choice in Aging delivered person-centered physical therapy, maintenance therapy, and fall prevention services to older adults and</p>

			individuals with disabilities, providing a vital alternative to institutionalization that allowed participants to age in place with independence, dignity, and connection to their communities.
Brighter Beginnings	Brighter Health Access	Antioch	Brighter Beginnings addressed the social determinants of health for low-income residents across Contra Costa County by conducting community outreach, screening individuals for unmet social needs, connecting them to healthcare coverage and supportive resources, and building staff capacity through certified health worker training, reducing barriers to care and advancing equitable health outcomes for underserved communities.

Medi-Cal

Kaiser Permanente provides coverage to Medi-Cal members in 22 counties in California through both direct contracts with the Department of Health Care Services (DHCS), and through delegated arrangements with other Medi-Cal managed care plans (MCPs). Kaiser Permanente also provides subsidized health care on a fee-for-service basis for Medi-Cal beneficiaries not enrolled as KFHP members. Reimbursement for some services is usually significantly below the cost of care and is considered subsidized care to non-member Medi-Cal fee-for-service patients.

Community Health Coverage Program (CHCP)

Kaiser Permanente’s CHCP provides health care coverage to people who have low-income and don’t have access to other public or private health coverage. CHCP enrolls qualifying individuals in a Kaiser Permanente Individual and Family Health Plan. Through CHCP, members’ monthly premiums are subsidized, and members do not have to pay copay or out-of-pocket costs for most care at Kaiser Permanente facilities. Through CHCP, members have a medical home that includes comprehensive coverage, preventive services and consistent access through the “front door” of the health delivery system.

Medical Financial Assistance (MFA)

Kaiser Permanente’s Medical Financial Assistance program (MFA) improves health care access for people with limited incomes and resources and is fundamental to Kaiser Permanente’s mission. Our MFA program helps patients who are low-income, uninsured, or underinsured cover the costs of care. The program provides temporary financial assistance or free care to patients who receive health care services from our providers, regardless of whether they have health coverage or can’t afford to pay.

3. 2026 Community Benefits Plan

a. 2026-2028 Implementation Strategies

Kaiser Permanente Antioch Medical Center has developed an implementation strategy (IS) for the priority needs it will address over the next three years [2026-2028], considering both Kaiser Permanente's and the community's assets and resources.

Kaiser Permanente Antioch Medical Center Community Health has identified the strategic focus, strategies, and expected impact for each priority health need, described in the tables below. While we recognize that IS strategies can address multiple health needs, each strategy is associated with the needs where we expect to see the greatest impact. Included with each strategy are expected outcomes and examples of available Kaiser Permanente resources and planned collaborations.

- Income and employment
- Housing
- Mental and behavioral health
- Access to care

Income and employment

Strategy	Expected outcomes	Available resources and planned collaboration
Grow a culturally competent health care workforce in order to improve equitable access to health care services.	<ul style="list-style-type: none"> • Decrease health care workforce shortages • Improve cultural competency • Improve health outcomes 	<ul style="list-style-type: none"> • Resources: Charitable contributions, health professions education and training programs, and health care career exposure programs • Planned collaboration: National organizations, community organizations, and safety net providers
Improve food and nutrition security and address diet-related health conditions by increasing equitable access to and affordability of nutritious and culturally relevant food options.	<ul style="list-style-type: none"> • Improve access to and quality of resources provided by community organizations providing social care • Improve health outcomes 	<ul style="list-style-type: none"> • Resources: Charitable contributions • Planned collaboration: Food banks and pantries, community organizations, and government agencies
Increase access to and quality of resources that improve social and environmental factors by investing in community organizations, schools, districts, or other public entities and by enhancing coordination between community and health care.	<ul style="list-style-type: none"> • Improve access to and quality of resources provided by community organizations providing social care • Improve health outcomes 	<ul style="list-style-type: none"> • Resources: Charitable contributions, and technical assistance • Planned collaboration: Government agencies, including local and state public health departments, community organizations, schools and school districts, and other hospitals

Housing

Strategy	Expected outcomes	Available resources and planned collaboration
Implement strategies to improve the health of homeless populations and reduce housing insecurity by strengthening the availability and	<ul style="list-style-type: none"> • Improve access to and quality of resources provided by community organizations providing social care • Improve health outcomes 	<ul style="list-style-type: none"> • Resources: Charitable contributions, and technical assistance • Planned collaboration: Government agencies, including local and state public health departments, community

b. Evaluation of the Community Benefit Plan’s Effectiveness

Kaiser Permanente Antioch Medical Center will monitor and evaluate the strategies listed above to assess progress and document the impact of those strategies on expected outcomes. Evaluation of the impact includes monitoring grantee progress (how many people were reached) and measuring short and intermediate term outcomes (e.g., what was the impact on the individuals served). Additionally, for each prioritized health need, the number of grants made, the number of dollars invested, and the number of community-based organizations supported are tracked.

In addition to the strategies developed as part of the CHNA and three-year IS process, many health needs are addressed by Kaiser Permanente business practices that contribute to community well-being, including environmentally responsible purchasing, waste reduction, and purchase of clean energy for facilities. We also conduct high-quality health research and disseminate findings intended to contribute to the literature by enhancing understanding of the impact of interventions designed to improve health outcomes.

4. Financial Summary

a. Explanation of Methodology Used to Determine Cost

Total Community Benefit expenditures are reported as follows:

- Medical care services for vulnerable populations include unreimbursed inpatient costs for participation in Kaiser Permanente-subsidized and government-sponsored health care insurance programs.
- Since 2006, figures for subsidized products have been reported on a cost-basis (e.g., the difference of total revenues collected for services less direct and indirect expenses).
- Grant and donations are recorded in the general ledger in the appropriate amount and accounting period on an accrual, not cash basis. The amount reported reflects hospital-specific, unreimbursed expenditures. When hospital-specific expenditures are not available, dollars are allocated to each hospital based on the percentage of KFHP members.
- The unreimbursed portion of medical, nursing, and other health care professional education and training costs are included.

Resource allocations are reported as follows:

- Financial expenditures are reported in exact amounts, if available, by hospital service area.
- If exact financial expenditure amounts are not available by hospital service area, then regional expenses are allocated proportionally based on KFHP membership or other quantifiable data.

b. Kaiser Permanente Antioch Medical Center Community Benefits Provided in 2025

This report outlines the hospital's net community benefit expenditures categorized into the following framework: medical care services, other services for vulnerable populations, other services for the broader community, and health research, education and training programs. Kaiser Permanente generates a range of nonquantifiable benefits, including community engagement through volunteerism, environmental stewardship, supplier diversity, and partnerships with community organizations, municipal leaders, and public health champions that address community needs.

Financial Assistance and Means-Tested Government Programs	Vulnerable Population	Broader Community	Total
Traditional Charity Care	\$ 18,824,657		\$ 18,824,657
Medi-Cal	\$ 41,375,309		\$ 41,375,309
Other Means-Tested Government (Indigent Care)	\$ 0		\$ 0
Sum Financial Assistance and Means-Tested Government Program	\$ 60,199,966		\$ 60,199,966

*Sum of Financial assistance, Means-Tested Government Programs and Other Benefits.

5. Certification Statement

Kaiser Permanente leadership reviewed and attested to the validity of the hospital Community Benefit Plan. The data and information reported is true, correct, and completed as required by Health and Safety Code sections 127340-127360 and Article 2 of Chapter 8.2 of Division 7 of Title 22 of the California Code of Regulations requiring all non-profit hospitals report on the community benefits they provide.

- Yvette Radford, Vice President, External & Community Affairs
- Mike Bowers, Senior Vice President, Operations Kaiser Foundation Health Plan/ Hospitals
