

Hospital Equity Measures Report

General Information

Report Type:	Hospital Equity Measures Report
Year:	2024
Hospital Name:	WHITTIER HOSPITAL MEDICAL CENTER
Facility Type:	General Acute Care Hospital
Hospital HCAI ID:	106190883
Report Period:	1/1/2024 - 12/31/2024
Status:	Complete
Due Date:	11/29/2025
Last Updated:	03/06/2026
Hospital Location with Clean Water and Air:	N
Hospital Web Address for Equity Report:	https://www.ahmchealth.com/whmc/

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

General acute care hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce>

-health-care-disparities/

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

36880

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	26745	36880	72.5
Spanish Language	6933	36880	18.8
Asian Pacific Islander Languages	2971	36880	8.1
Middle Eastern Languages	suppressed	36880	suppressed
American Sign Language	suppressed	36880	suppressed
Other Languages	201	36880	0.5

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a general acute care hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:

<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

Y

CMS HCHE Measure Domain 2: Data Collection (Yes/No)

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.

- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health information.
- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

Y

CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

Y

CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

Y

CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

Y

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

General acute care hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

5599

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

5729

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

97.7

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity	310	5.5	310	5.5
Housing Instability	112	2	112	2
Transportation Problems	383	6.8	383	6.8
Utility Difficulties	15	0.3	15	0.3
Interpersonal Safety	suppressed	suppressed	suppressed	suppressed

Core Quality Measures for General Acute Care Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, general acute care hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

404

Total number of respondents to HCAHPS Question 19

459

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

88

Total number of people surveyed on HCAHPS Question 19

3531

Response rate, or the percentage of people who responded to HCAHPS Question 19

13

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					

Age	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					

Sex assigned at birth	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Male					
Unknown					

Payer Type	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Medicare					
Medicaid					
Private					
Self-Pay					
Other					

Preferred Language	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)

Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans woman					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. General acute care hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

376
Total number of respondents to HCAHPS Question 17
459

Percentage of respondents who responded "yes" to HCAHPS Question 17
81.9

Total number of people surveyed on HCAHPS Question 17
3531

Response rate, or the percentage of people who responded to HCAHPS Question 17
13

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Agency for Healthcare Research and Quality (AHRQ) Indicators

General acute care hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:

<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. General acute care hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

19

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

232

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

81.9

Death Rate among Surgical Inpatients with Serious Treatable Complications

The Death Rate among Surgical Inpatients with Serious Treatable Complications is defined as the rate of in-hospital deaths per 1,000 surgical discharges among patients ages 18-89 years old or obstetric patients with serious treatable complications. General acute care hospitals report this measure by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Patient Safety Indicator is 04. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:
https://qualityindicators.ahrq.gov/Downloads/Modules/PSI/V2023/TechSpecs/PSI_04_Death_Rate_among_Surgical_Inpatients_with_Serious_Treatable_Complications.pdf

California Maternal Quality Care Collaborative (CMQCC) Core Quality Measures

There are three core quality maternal measures adopted from the California Maternal Quality Care Collaborative (CMQCC).

CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate

The CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate is defined as nulliparous women with a term (at least 37 weeks gestation), singleton baby in a vertex position delivered by cesarian birth. General acute care hospitals report the NTSV Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information, please visit the following link by copying and pasting the URL into your web browser:

CMQCC Vaginal Birth After Cesarean (VBAC) Rate

The CMQCC Vaginal Birth After Cesarean (VBAC) Rate is defined as vaginal births per 1,000 deliveries by patients with previous Cesarean deliveries. General acute care hospitals report the VBAC Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The VBAC Rate uses the specifications of AHRQ Inpatient Quality Indicator 22. For more information, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_\(VBAC\)_Delivery_Rate_Uncomplicated.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_(VBAC)_Delivery_Rate_Uncomplicated.pdf)

CMQCC Exclusive Breast Milk Feeding Rate

The CMQCC Exclusive Breast Milk Feeding Rate is defined as the newborns per 100 who reached at least 37 weeks of gestation (or 3000g if gestational age is missing) who received breast milk

exclusively during their stay at the hospital. Other criteria are that the newborns did not go to the neonatal intensive care unit (NICU), transfer, or die, did not reflect multiple gestation, and did not have codes for parenteral nutrition or galactosemia. General acute care hospitals report the Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The CMQCC Exclusive Breast Milk Feeding Rate uses the Joint Commission National Quality Measure PC-05. For more information, please visit the following link by copying and pasting the URL into your web browser: <https://manual.jointcommission.org/releases/TJC2024B/MIF0170.html>

Number of newborn cases that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

General acute care hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate – Any Eligible Condition

Number of inpatient hospital admissions which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

331

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

2509

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition

within 30 days of hospital discharge for patients aged 18 and older

13.2

Health Equity Plan

All general acute care hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 15. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)	50 to 64	20.9	18 to 34	3	6.9
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)	65 and older	15.7	18 to 34	3	5.2
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)	35 to 49	11.2	18 to 34	3	3.7
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Expected Payor	Medicare	16.6	Private	8.8	1.9
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Sex Assigned at Birth	Male	18.1	Female	10.1	1.8
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Race and/or Ethnicity	White	18.8	Hispanic or Latino	10.6	1.8
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Sex Assigned at Birth	Male	15.8	Female	8.9	1.8
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Race and/or Ethnicity	Asian	14.3	Hispanic or Latino	10.6	1.3
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Expected Payor	Medicaid	11.8	Private	8.8	1.3

Plan to address disparities identified in the data

Whittier Hospital Medical Center (WHMC) had 9 top disparities, all of which pertained to readmission rates. Below is a breakdown of each disparity, including steps to address each one's goals for improvement.

- All-cause unplanned 30-day hospital readmission rates for ages 50-64
- All-cause unplanned 30-day hospital readmission rates for ages 65 and older
- All-cause unplanned 30-day hospital readmission rates for ages 35 to 49
- All-cause unplanned 30-day hospital readmission rates for Medicare patients
- All-cause unplanned 30-day hospital readmission rates for Caucasians
- All-cause unplanned 30-day hospital readmission rates for males
- All-cause unplanned 30-day hospital readmission rates, stratified by behavioral health diagnosis (no behavior health diagnosis) for males
- All-cause unplanned 30-day hospital readmission rates for Medicaid patients
- All-cause unplanned 30-day hospital readmission rates for Asian patients

WHMC is committed to providing compassionate, quality care to our patients in a family-friendly environment. We approach our improvements related to disparities in our readmissions as a whole. Upon admission, each patient is evaluated by our social services team of professionals who are trained to assess patient needs, develop a comprehensive plan for a safe transition to home or another facility. They work closely with the multidisciplinary team of physicians and nurses through daily rounding to ensure clear communication and updated information is provided to patients and families. They also arrange for necessary services or equipment, care plans and resources as well as manage referrals on behalf of the patient. It is important to WHMC that patients are involved in

their care and participate and understand their discharge needs.

We have set a goal to reduce overall readmissions by 2%. We plan to do this by first better understanding and assessing the reasons for readmission. When patients are admitted and flagged as a readmission, a high-priority referral will be made to Social Services and a readmission assessment will be performed to determine contributing factors. Whether the reasons are medical and treatment related, patient care and discharge related or patient related factors, an improvement plan will be developed that specifically addresses those concerns.

Performance in the priority area

General acute care hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

WHMC is dedicated to person-centered care as evidenced with our mission statement to provide compassionate, quality care and to prioritize caring for patients and their loved ones. We are committed to person-centered care through initiatives focused on social, economic, emotional and spiritual well-being, patient safety, communication and respect for individualized care and treatment. The healthcare team works with the patient and their families to develop personalized care plans that are tailored to the patient's needs and preferences. Patients and family are active participants in their care treatment and discharge plans. To further our commitment to patient - centered care, we are developing a patient and family advisory group to review our quality initiatives and programs. Their collaboration, participation and feedback will ensure that their voice is important in guiding our quality improvement plans. The healthcare team completes annual training on diversity, equity and inclusion in order to foster trust while providing respectful care.

Patient safety

Patient safety is our top priority at WHMC. Whittier Hospital has been recognized with a five-star rating by the Centers for Medicare and Medicaid Services (CMS), the highest rating approved by the federal agency and the only hospital to receive the prestigious rating in Whittier in 2024. The hospital earned and sustained numerous "A" Hospital Safety Grade from The Leapfrog Group, highlighting our unwavering commitment to delivering the highest quality care, including prevention of errors and injuries, infections and keeping our patients safe from harm and complications. In addition, our outstanding Pediatric Subacute Unit, "The Children's Center" has been consistently receiving a 5-star rating for Overall Quality by CMS - Nursing Home Compare. We employ a Patient Safety Officer and 3 Patient Experience Coordinators (Spanish and Chinese speaking). These individuals conduct daily rounding to listen to concerns, advocate for patients, identify potential gaps in care.

Addressing patient social drivers of health

At WHMC, every patient is assessed for social determinants of health throughout their hospital stay by our interdisciplinary team of nurses and social workers. These assessments examine a patient's access to economic stability, education, healthcare access, stable housing, nutritious food, safe living environments and reliable transportation. When needs are identified, a social worker team member will connect with the patient to understand their needs further and provide the appropriate resources needed. It's important that the patient understands how they can access them and

referrals are made and specific to each patient's preferences, including a written resource guide. Education is given to family members on how they can support ongoing access to care.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

WHMC strives to deliver the highest standard of care through the development and implementation of evidence-based practices that supports optimal health and outcomes for our patients. WHMC has established safety bundled care for a wide range of conditions including sepsis and maternal safety bundles. WHMC's commitment to quality is reflected with our steady improvement with the sepsis bundle compliance, averaging 71% in 2023, 81% in 2024 and our highest quarter in 2025 was 91% compliance, surpassing peer benchmarks. For the past 5 years, WHMC's complication rates are zero for foreign objects retained after surgery, air embolism, and CAUTI. In 2022, in partnership with CMQCC (California Maternal California Care Collaboration), WHMC advanced maternal care by implementing the latest evidence and best practices in standardizing post-partum obstetric hemorrhage and preeclampsia care. In the past 5 years our hemorrhage complications rate per 1,000 is 1.64, compared to the State average rate of 4.23.

Care coordination

At WHMC, discharge planning begins the moment a patient enters the hospital. Our planning ensures our patients a safe transition to their next level of care, which can be home, a rehabilitation facility or another care setting. This requires time, care, coordination and thoughtful planning between professionals, the patient and their family or caregiver. Our team of social workers involves the patient and families to review provider recommended discharge plans and options. Patients are encouraged to ask questions and express concerns. Care coordination involves patient-centered care that addresses physical, mental and social health. Our priority is to always provide patients with meaningful choices, encouraging their input and ensuring a seamless transition between care settings.

Access to care

WHMC has served the Whittier community for over 50 years, providing 24/7 medical care, as well as community benefits like health screenings, immunizations, education programs and support for social needs such as food insecurity and housing. We provide outpatient services in diagnostics, lab, perinatal care, rehabilitation and senior activity center. WHMC enhances accessibility through free interpreter services in many languages, including sign language, and is available 24/7. WHMC offers financial assistance and charity care programs to reduce costs barriers.

Methodology Guidelines
