

Hospital Equity Measures Report

General Information

| | |
|---|---|
| Report Type: | Hospital Equity Measures Report |
| Year: | 2024 |
| Hospital Name: | SAN DIEGO COUNTY PSYCHIATRIC HOSPITAL |
| Facility Type: | Acute Psychiatric Hospital |
| Hospital HCAI ID: | 106374055 |
| Report Period: | 1/1/2024 - 12/31/2024 |
| Status: | Complete |
| Due Date: | 11/29/2025 |
| Last Updated: | 01/12/2026 |
| Hospital Location with Clean Water and Air: | N |
| Hospital Web Address for Equity Report: | sandiegocounty.gov/content/sdc/hhsa/programs/bhs/SDCPH.html |

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

Acute psychiatric hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce>

-health-care-disparities/

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

1131

Table 1. Summary of preferred languages reported by patients.

| Languages | Number of patients who report preferring language | Total number of patients | Percentage of total patients who report preferring language (%) |
|----------------------------------|---|--------------------------|---|
| English Language | 1025 | 1131 | 90.6 |
| Spanish Language | suppressed | 1131 | suppressed |
| Asian Pacific Islander Languages | suppressed | 1131 | suppressed |
| Middle Eastern Languages | suppressed | 1131 | suppressed |
| American Sign Language | suppressed | 1131 | suppressed |
| Other Languages | suppressed | 1131 | suppressed |

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a acute psychiatric hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:
<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

N

CMS HCHE Measure Domain 2: Data Collection (Yes/No)

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health

information.

- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

N

CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

N

CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

N

CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

N

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

Acute psychiatric hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

222

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

260

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

85.4

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

| Social Driver of Health | Number of positive screenings | Rate of positive screenings (%) | Number of positive screenings who received intervention | Rate of positive screenings who received intervention (%) |
|--------------------------------|--------------------------------------|--|--|--|
| Food Insecurity | 179 | 29.6 | 53 | 100 |
| Housing Instability | 181 | 47.5 | 86 | 100 |
| Transportation Problems | 180 | 33 | 0 | 0 |
| Utility Difficulties | 180 | 30.6 | 0 | 0 |
| Interpersonal Safety | 178 | 25.8 | 46 | 100 |

Core Quality Measures for General Acute Psychiatric Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, acute psychiatric hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

NA

Total number of respondents to HCAHPS Question 19

NA

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

NA

Total number of people surveyed on HCAHPS Question 19

NA

Response rate, or the percentage of people who responded to HCAHPS Question 19

NA

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|--|---------------------------|---|-----------------------------------|--|
| American Indian or Alaska Native | | | | | |
| Asian | | | | | |
| Black or African American | | | | | |
| Hispanic or Latino | | | | | |
| Middle Eastern or North African | | | | | |
| Multiracial and/or Multiethnic (two or more races) | | | | | |
| Native Hawaiian or Pacific Islander | | | | | |
| White | | | | | |

| Age | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------------------|--|---------------------------|---|-----------------------------------|--|
| Age < 18 | | | | | |
| Age 18 to 34 | | | | | |
| Age 35 to 49 | | | | | |
| Age 50 to 64 | | | | | |
| Age 65 Years and Older | | | | | |

| Sex assigned at birth | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-----------------------|--|---------------------------|---|-----------------------------------|--|
| Female | | | | | |
| Male | | | | | |
| Unknown | | | | | |

| Payer Type | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------|--|---------------------------|---|-----------------------------------|--|
| Medicare | | | | | |
| Medicaid | | | | | |
| Private | | | | | |
| Self-Pay | | | | | |
| Other | | | | | |

| Preferred Language | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|----------------------------------|--|---------------------------|---|-----------------------------------|--|
| English Language | | | | | |
| Spanish Language | | | | | |
| Asian Pacific Islander Languages | | | | | |
| Middle Eastern Languages | | | | | |
| American Sign Language | | | | | |
| Other/Unknown Languages | | | | | |

| Disability Status | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--------------------------------------|---|----------------------------------|--|--|---|
| Does not have a disability | | | | | |
| Has a mobility disability | | | | | |
| Has a cognition disability | | | | | |
| Has a hearing disability | | | | | |
| Has a vision disability | | | | | |
| Has a self-care disability | | | | | |
| Has an independent living disability | | | | | |

| Sexual Orientation | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|----------------------------|---|----------------------------------|--|--|---|
| Lesbian, gay or homosexual | | | | | |
| Straight or heterosexual | | | | | |
| Bisexual | | | | | |
| Something else | | | | | |
| Don't know | | | | | |
| Not disclosed | | | | | |

| Gender Identity | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|---|----------------------------------|--|--|---|
| Female | | | | | |
| Female-to-male (FTM)/ transgender male/trans man | | | | | |
| Male | | | | | |
| Male-to-female (MTF)/ transgender female/trans | | | | | |
| Non-conforming gender | | | | | |
| Additional gender category or other | | | | | |
| Not disclosed | | | | | |

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. Acute psychiatric hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

NA

Total number of respondents to HCAHPS Question 17

NA

Percentage of respondents who responded "yes" to HCAHPS Question 17

NA

Total number of people surveyed on HCAHPS Question 17

NA

Response rate, or the percentage of people who responded to HCAHPS Question 17

NA

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|---|----------------------------------|----------------------------------|--|--|---|
| American Indian or Alaska Native | | | | | |
| Asian | | | | | |
| Black or African American | | | | | |
| Hispanic or Latino | | | | | |
| Middle Eastern or North African | | | | | |
| Multiracial and/or Multiethnic (two or more races) | | | | | |
| Native Hawaiian or Pacific Islander | | | | | |
| White | | | | | |

| Age | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-------------------------------|----------------------------------|----------------------------------|--|--|---|
| Age < 18 | | | | | |
| Age 18 to 34 | | | | | |
| Age 35 to 49 | | | | | |
| Age 50 to 64 | | | | | |
| Age 65 Years and Older | | | | | |

| Sex assigned at birth | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------------------------|----------------------------------|----------------------------------|--|--|---|
| Female | | | | | |
| Male | | | | | |
| Unknown | | | | | |

| Payer Type | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-------------------|----------------------------------|----------------------------------|--|--|---|
| Medicare | | | | | |
| Medicaid | | | | | |
| Private | | | | | |
| Self-Pay | | | | | |
| Other | | | | | |

| Preferred Language | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|---|----------------------------------|----------------------------------|--|--|---|
| English Language | | | | | |
| Spanish Language | | | | | |
| Asian Pacific Islander Languages | | | | | |
| Middle Eastern Languages | | | | | |
| American Sign | | | | | |
| Other/Unknown Languages | | | | | |

| Disability Status | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|---|----------------------------------|----------------------------------|--|--|---|
| Does not have a disability | | | | | |
| Has a mobility disability | | | | | |
| Has a cognition | | | | | |
| Has a hearing disability | | | | | |
| Has a vision disability | | | | | |
| Has a self-care | | | | | |
| Has an independent living disability | | | | | |

| Sexual Orientation | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-----------------------------------|----------------------------------|----------------------------------|--|--|---|
| Lesbian, gay or homosexual | | | | | |
| Straight or heterosexual | | | | | |
| Bisexual | | | | | |
| Something else | | | | | |
| Don't know | | | | | |
| Not disclosed | | | | | |

| Gender Identity | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|---------------------------|---------------------------|-----------------------------------|-----------------------------------|--|
| Female | | | | | |
| Female-to-male (FTM)/ transgender male/trans man | | | | | |
| Male | | | | | |
| Male-to-female (MTF)/ transgender female/trans woman | | | | | |
| Non-conforming gender | | | | | |
| Additional gender category or other | | | | | |
| Not disclosed | | | | | |

Agency for Healthcare Research and Quality (AHRQ) Indicators

Acute psychiatric hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:

<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. Acute psychiatric hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

Table 5. Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of in-hospital deaths that meet the inclusion/exclusion criteria | Number of hospital discharges that meet the inclusion/exclusion criteria | Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%) |
|--|--|---|--|
| American Indian or Alaska Native | | | |
| Asian | | | |
| Black or African American | | | |
| Hispanic or Latino | | | |
| Middle Eastern or North African | | | |
| Multiracial and/or Multiethnic (two or more) | | | |
| Native Hawaiian or Pacific Islander | | | |
| White | | | |

| Age | Number of in-hospital deaths that meet the inclusion/exclusion criteria | Number of hospital discharges that meet the inclusion/exclusion criteria | Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%) |
|------------------------|--|---|--|
| Age < 18 | | | |
| Age 18 to 34 | | | |
| Age 35 to 49 | | | |
| Age 50 to 64 | | | |
| Age 65 Years and Older | | | |

| Sex assigned at birth | Number of in-hospital deaths that meet the inclusion/exclusion criteria | Number of hospital discharges that meet the inclusion/exclusion criteria | Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%) |
|------------------------------|--|---|--|
| Female | | | |
| Male | | | |
| Unknown | | | |

| Payer Type | Number of in-hospital deaths that meet the inclusion/exclusion criteria | Number of hospital discharges that meet the inclusion/exclusion criteria | Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%) |

| Lesbian, gay or homosexual | | | |
| Straight or heterosexual | | | |
| Bisexual | | | |
| Something else | | | |
| Don't know | | | |
| Not disclosed | | | |

| Gender Identity | Number of in-hospital deaths that meet the inclusion/exclusion criteria | Number of hospital discharges that meet the inclusion/exclusion criteria | Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%) |
|--|--|---|--|
| Female | | | |
| Female-to-male (FTM)/ transgender male/trans man | | | |
| Male | | | |
| Male-to-female (MTF)/ transgender female/trans woman | | | |
| Non-conforming gender | | | |
| Additional gender category or other | | | |
| Not disclosed | | | |

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

Acute psychiatric hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF)

Number of inpatient admissions to an IPF which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

55

Total number of patients who were admitted to an IPF and were 18 years or older at time of admission

241

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

22.8

Table 6. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate for any eligible condition by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of inpatient readmissions | Total number of admitted patients | Readmission rate (%) |
|--|----------------------------------|-----------------------------------|----------------------|
| American Indian or Alaska Native | suppressed | suppressed | suppressed |
| Asian | suppressed | suppressed | suppressed |
| Black or African American | suppressed | suppressed | suppressed |
| Hispanic or Latino | 14 | 83 | 16.9 |

CMS Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program Screening for Metabolic Disorders

Acute psychiatric hospitals are required to report the rate of structured screenings for metabolic disorders among patients with a prescription for one or more routinely scheduled antipsychotic medications. The structured screenings must contain (1) body mass index (BMI), (2) blood pressure, (3) blood glucose or HbA1c, and (4) a lipid panel, and be completed at least once in the 12 months prior to the patient's date of discharge. The rate of patient screenings for metabolic disorders are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the structured screenings for metabolic disorders, please see page 92 of the report by visiting the following link by copying and pasting the URL into your web browser:

https://www.qualityreportingcenter.com/globalassets/2021/05/iqr/ipfqr_programmanualv7.0_final508.pdf

Number of patients with a prescription for one or more routinely scheduled antipsychotic medications who received a metabolic screening in the 12 months prior to discharge, either prior to or during the index IPF stay

NA

Number of discharges from an IPF during the measurement period with a prescription for one or more routinely scheduled antipsychotic medications

NA

Rate of patients discharged from an IPF with a prescription for one or more routinely scheduled antipsychotic medications for which a structured metabolic screening was completed in the 12 months prior to discharge, either prior to or during the index IPF stay

NA

Table 11. Rate of patients who received structured metabolic screenings with a prescription for a routinely scheduled antipsychotic medication by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of eligible patients who received metabolic screening | Total number of eligible discharges | Rate of eligible patients who received metabolic screening (%) |
|--|---|--|---|

| Not disclosed | | | |

Health Equity Plan

All acute psychiatric hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 14. Top 10 disparities and their rate ratio values.

| Measures | Stratifications | Stratification Group | Stratification Rate | Reference Group | Reference Rate | Rate Ratio |
|---|-----------------------------------|----------------------|---------------------|--------------------|----------------|------------|
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF). | Age (excluding maternal measures) | | | 35 to 49 | 14.9 | 1.8 |

Plan to address disparities identified in the data

San Diego County Psychiatric Hospital's (SDCPH) mission is to provide safe, patient-centered care and compassionate, high-quality mental health intervention and stabilization to the vulnerable adult population of San Diego County. SDCHP is committed to advancing health equity through targeted strategic planning. The hospital identifies gaps in care, implements improvement initiatives, and monitors outcomes to ensure that all patients receive safe, effective, and equitable mental health services. Our approach is to analyze 30-day readmission data and how patient connection to outpatient services can help reduce readmission rates. With services extending beyond inpatient admission, this will help prevent relapses, identify symptoms prior to crisis level, facilitate medication compliance, ensure therapy and engagement to other outpatient programs that promote coping strategies, and connection to other services such as housing support, substance use treatment, and community resources. Disparity groups are imbedded in overall readmission rates and strategic planning. As the County's safety-net hospital, we design readmission reduction strategies that are inclusive and applicable to all patients, regardless of background or clinical complexity. These strategies aim to promote equitable care, support recovery, and reduce unnecessary hospitalizations.

Performance in the priority area

Acute psychiatric hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

During admission at SDCHP, the treatment team conducts a comprehensive assessment of patients' psychiatric, medical, social, and cultural needs. Based on this assessment, individualized

treatment plans are developed that align with each patient's goals, diagnoses, preferences (Wellness Wishlist), and recovery objectives. Care plans are regularly updated based on patient progress and feedback. Staff recognize the impact of past trauma on mental health and recovery, and are trained to respond with sensitivity, empathy, and cultural humility. Interventions are adapted to meet patients' abilities as well as their cultural, linguistic, and social needs. Individual and group activities are tailored to each patient's unique strengths and skillset, promoting skill development, enhancing coping strategies, supporting long-term recovery, and reducing the risk of readmission. Patients experiencing a mental health emergency are stabilized and transitioned to the least restrictive level of care appropriate to their needs. Services are delivered in a warm, welcoming environment by dedicated psychiatrists, internists, nurses, and ancillary staff. Patient experience is monitored through satisfaction surveys, which show an overall satisfaction rate of 82%. Survey domains include patient education, medication management, communication regarding legal status, cultural sensitivity, facility cleanliness, treatment planning, sense of safety and respect.

Patient safety

SDCPH provides care for mental health and substance use disorders through a lens of regulatory compliance, quality improvement, and risk management, utilizing evidence-based practices and data-driven approaches. Staff are trained in trauma-informed care, utilize professional interpreters as needed, and tailor interventions according to each patient's abilities, strengths, and unique needs. While hospitalized, processes are in place to ensure patient safety, including 15-minute rounding, individualized treatment planning, medication management, patient and family education, symptom monitoring, enhanced observation as appropriate, ongoing assessment and reassessment by the interdisciplinary team, medication reconciliation, and real-time communication of patient needs and safety risks. During crises, staff use Crisis Prevention Intervention (CPI) techniques and employ the least restrictive interventions to de-escalate situations safely. These safety-focused practices contribute to high patient confidence in care, with an overall patient satisfaction survey rate of 86.9% for safety.

Addressing patient social drivers of health

SDCPH addresses social drivers of health by identifying and responding to non-clinical factors that impact mental health, including housing instability, food insecurity, transportation barriers, utility challenges, interpersonal safety concerns, and limited social support. Interventions include: screening for social needs during hospitalization, linkage to community food resources, including San Diego Food Bank, Feeding San Diego, community meal programs, faith-based organizations, and 2-1-1 referrals, distribution of shelter resource lists and connection to housing navigation services, provision of transportation support, including day bus passes, taxi vouchers, referrals to Next Steps, County-funded out-of-county transport when indicated, and coordination with health plans, referral to LIHEAP for patients experiencing utility payment difficulties, and provision of crisis and safety resources, including Access & Crisis Hotline and emergency services information. Some social driver metrics (e.g., utility assistance and transportation intervention rates) have limited data availability for 2024.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

SDCPH provides outcome-driven, trauma-informed, culturally competent treatment that is recovery-oriented and client- and family-centered. During admission, patients are actively encouraged to participate in individual therapy, group therapy, and substance use-focused groups. These sessions help patients develop coping strategies, enhance emotional regulation, address substance use

challenges, and build skills that support long-term recovery and overall well-being. The hospital employs comprehensive discharge planning, ensures referrals to community services, and facilitates warm handoffs to outpatient providers. Assigned case managers and social workers assist patients in navigating mental health services, housing, Medi-Cal, and other social service benefits. Patients at higher risk for relapse or readmission are referred to Enhanced Care Coordination (ECC), County case management, peer support, and substance use counseling, as appropriate. Safety plans are developed collaboratively with patients to reduce safety risks and the likelihood of readmission. These services leverage the broader continuum of care through ECC and collaboration with hospital and community partners. Quantitative performance data for this priority area were not available for calendar year 2024.

Care coordination

SDCPH uses multi-disciplinary, patient-centered care coordination model designed to ensure safe, timely, and equitable transitions across the behavioral-health continuum. Care coordination efforts focus on reducing fragmentation, addressing social drivers of health, and supporting long-term recovery for individuals with serious mental illness. Examples include daily interdisciplinary rounds by psychiatry, nursing, social work, pharmacy and recreation therapy and peer support specialist. Treatment planning is individualized using real-time assessment and reassessment data and communication from interdisciplinary team. Close collaboration occurs with community partners such as outpatient clinics, ACT case management teams, crisis residential facilities, conservatorship, public guardian, housing navigation centers and family members. Data is not available for 2024 in this area.

Access to care

SDCPH is part of the Behavioral Health Services continuum of care, providing prevention, early intervention, outpatient services, crisis care, substance use treatment, crisis recovery, and inpatient psychiatric services regardless of ability to pay. As an acute psychiatric inpatient facility, SDCPH serves as a safety-net provider for individuals requiring the highest level of psychiatric care. The hospital utilizes the State mandate on “No Wrong Door” policy to ensure that patients have access to the right care, in the right place, and at the right time (BHIN 22-011). The hospital follows the requirements of the Medi-Cal Manage Care Plans (MCPs) that includes screening, warm handoffs, and shared responsibilities. As the patient move across continuum of care, providers shall complete care transition communication to ensure continuity of care. The hospital continues its efforts to improve care coordination and discharge planning through collaborative workgroup with the County’s outpatient clinics. The collaborative clarifies department workflows, staff roles and responsibilities in ensuring timely and appropriate services and placement. Quantitative data for this priority area were not available for calendar year 2024.

Methodology Guidelines

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)
