

Hospital Equity Measures Report

General Information

Report Type:	Hospital Equity Measures Report
Year:	2024
Hospital Name:	JOHN MUIR BEHAVIORAL HEALTH CENTER
Facility Type:	Acute Psychiatric Hospital
Hospital HCAI ID:	106074039
Report Period:	01/01/2024 - 12/31/2024
Status:	Submitted
Due Date:	11/29/2025
Last Updated:	03/18/2026
Hospital Location with Clean Water and Air:	Y
Hospital Web Address for Equity Report:	www.johnmuirhealth.com, "About" tab

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

Acute psychiatric hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce-health-care-disparities/>

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

3005

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	2869	3005	95.5
Spanish Language	116	3005	3.9
Asian Pacific Islander Languages	suppressed	3005	suppressed
Middle Eastern Languages	suppressed	3005	suppressed
American Sign Language	suppressed	3005	suppressed
Other Languages	suppressed	3005	suppressed

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a acute psychiatric hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:
<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

Y

CMS HCHE Measure Domain 2: Data Collection (Yes/No)

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health information.

- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

Y

CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

Y

CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

Y

CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

Y

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

Acute psychiatric hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

716

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

734

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

97.5

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity	48	6.7	0	
Housing Instability	107	14.9	0	
Transportation Problems	26	3.6	0	
Utility Difficulties	38	5.3	0	
Interpersonal Safety	26	3.6	0	

Core Quality Measures for General Acute Psychiatric Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, acute psychiatric hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

NA

Total number of respondents to HCAHPS Question 19

NA

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

NA

Total number of people surveyed on HCAHPS Question 19

NA

Response rate, or the percentage of people who responded to HCAHPS Question 19

NA

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					

Age	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					

Sex assigned at birth	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Male					
Unknown					

Payer Type	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Medicare					
Medicaid					
Private					
Self-Pay					
Other					

Preferred Language	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
English Language					
Spanish Language					
Asian Pacific Islander Languages					
Middle Eastern Languages					
American Sign Language					
Other/Unknown Languages					

Disability Status	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Does not have a disability					
Has a mobility disability					
Has a cognition disability					
Has a hearing disability					
Has a vision disability					
Has a self-care disability					
Has an independent living disability					

Sexual Orientation	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Lesbian, gay or homosexual					
Straight or heterosexual					
Bisexual					
Something else					
Don't know					
Not disclosed					

Gender Identity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. Acute psychiatric hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

NA

Total number of respondents to HCAHPS Question 17

NA

Percentage of respondents who responded "yes" to HCAHPS Question 17

NA

Total number of people surveyed on HCAHPS Question 17

NA

Response rate, or the percentage of people who responded to HCAHPS Question 17

NA

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					

Age	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					

Sex assigned at birth	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Male					
Unknown					

Payer Type	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)

Male					
Male-to-female (MTF)/ transgender female/trans woman					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Agency for Healthcare Research and Quality (AHRQ) Indicators

Acute psychiatric hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:

<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. Acute psychiatric hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

NA

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

Acute psychiatric hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF)

Number of inpatient admissions to an IPF which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

45

Total number of patients who were admitted to an IPF and were 18 years or older at time of admission

264

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

17.0

CMS Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program Screening for Metabolic Disorders

Acute psychiatric hospitals are required to report the rate of structured screenings for metabolic disorders among patients with a prescription for one or more routinely scheduled antipsychotic medications. The structured screenings must contain (1) body mass index (BMI), (2) blood pressure, (3) blood glucose or HbA1c, and (4) a lipid panel, and be completed at least once in the 12 months prior to the patient's date of discharge. The rate of patient screenings for metabolic disorders are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the structured screenings for metabolic disorders, please see page 92 of the report by visiting the following link by copying and pasting the URL into your web browser:

Health Equity Plan

All acute psychiatric hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 14. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF).	Sex Assigned at Birth	Female	19.3	Male	14.5	1.3
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF).	Expected Payor	Medicare	23.3	Other	21.4	1.1
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF).	Age (excluding maternal measures)	18 to 34	16.9	35 to 49	16.4	1.0

Plan to address disparities identified in the data

In response to the requirements of California Assembly Bill 1204 (AB 1204), this report presents our analysis of health status and access to care disparities within our service area. Utilizing the Hospital Quality Institute (HQI) Platform with SpeedTrack we were provided with our comprehensive Data

Analysis which identified our top three (3) disparities. Our plan for addressing these disparities is detailed herein.

Three (3) top disparities are apparent across patients captured as an All-Cause Unplanned 30-Day Readmission. Below we outline a plan to address contributing factors to unplanned readmissions.

Population impact: Female (sex assigned at birth) patients, patients with Medicare, and patients ages 18-34.

Analysis: Female patients and patients with Medicare show higher readmission rates compared to their reference groups. Patients ages 18-34, with a rate ratio of 1.0, do not show as significant a disparity in readmission rates and we will continue to monitor this while prioritizing action plans for the groups with rate ratios >1.0.

Actions:

Overall Readmission rates outperform the benchmark, remaining consistently under 5% (benchmark is under 10%); however, we continually work to improve readmissions with the following action plans:

Complex care meetings twice per week with leadership and front-line clinical teams

Improving access to medications after discharge by looking at discharge meds a day in advance, collaborating with providers and pharmacy

Our team schedules follow-up appointments for patients w/in 7 days of discharge

The target average length of stay is 6-7 days in Acute Psychiatric Treatment, to include coordination of care and access to treatment in order to prevent life threatening behaviors and reduce readmissions.

support continuous improvement of multidisciplinary teams for transitional care management Social Determinates of Health (SDOH) Screening of all patients for needs before discharge

link patients to mental health, housing, food, and transportation resources Continue support of and investment in community partners to prevent unplanned readmissions

Timeframe: Ongoing, monitored quarterly

Performance in the priority area

Acute psychiatric hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

In response to the requirements of California Assembly Bill 1204 (AB 1204), this report presents our analysis of health status and access to care disparities within our service area. Utilizing the Hospital Quality Institute (HQI) Platform with SpeedTrack we were provided with our comprehensive Data Analysis which identified our top three (3) disparities. Our plan for addressing these disparities is detailed herein.

Three (3) top disparities are apparent across patients captured as an All-Cause Unplanned 30-Day Readmission. Below we outline a plan to address contributing factors to unplanned readmissions.

Population impact: Female (sex assigned at birth) patients, patients with Medicare, and patients

ages 18-34.

Analysis: Female patients and patients with Medicare show higher readmission rates compared to their reference groups. Patients ages 18-34, with a rate ratio of 1.0, do not show as significant a disparity in readmission rates and we will continue to monitor this while prioritizing action plans for the groups with rate ratios >1.0.

Actions:

Overall Readmission rates outperform the benchmark, remaining consistently under 5% (benchmark is under 10%); however, we continually work to improve readmissions with the following action plans:

Complex care meetings twice per week with leadership and front-line clinical teams

Improving access to medications after discharge by looking at discharge meds a day in advance, collaborating with providers and pharmacy

Our team schedules follow-up appointments for patients w/in 7 days of discharge

The target average length of stay is 6-7 days in Acute Psychiatric Treatment, to include coordination of care and access to treatment in order to prevent life threatening behaviors and reduce readmissions.

support continuous improvement of multidisciplinary teams for transitional care management Social Determinates of Health (SDOH) Screening of all patients for needs before discharge

link patients to mental health, housing, food, and transportation resources Continue support of and investment in community partners to prevent unplanned readmissions

Timeframe: Ongoing, monitored quarterly

Patient safety

Overview

Patient Safety centers on preventing harm events and ensuring accountability across all levels of care.

Equity Considerations

All harm event metrics are stratified by Race, Ethnicity, and Language (REAL) to identify disparities and guide interventions.

Programs & Practices

Staff trained by Crisis Prevention Institute to utilize patient-centered, trauma-informed approach for de-escalation, and considerations for risk

Workplace Violence Committee with objective to reduce harm and ensure evidence-based practices are being utilized and evaluate safety regularly•

Integrated Patient Safety Program with event reporting and risk mitigation

Board and leadership accountability for safety outcomes

Performance Data

True North Measure: Harm Events (composite measure of restraint, falls, pressure injuries, hospital-acquired conditions, and other harm events)

REAL-stratified safety metrics reviewed by leadership & committees

Improvements & Plans

Reduce harm event rate by 10% by end of 2026.

Addressing patient social drivers of health

Overview

We aim to identify and address health-related social needs (HRSNs) impacting patient outcomes.

Equity Considerations

Screening protocols are being implemented to screen adult patients for social needs and those who screen “positive” for a HRSN are connected with community resources before discharge.

Programs & Practices

Social Determinates of Health (SDOH) screening for all patients

Care team provides resources to all patients who screens positive for any needs

Community Partnerships link patients to mental health, housing, food, transportation, and other resources

Community Partnerships

We are engaged in many community partnerships. Some examples are:

The Mental Health Connection promotes reducing health disparities for those living with mental illness.

The Miles Hall Foundation promotes reducing health disparities across race and those living with mental illness

The Monument Crisis Center and Shelter Inc. work to reduce health disparities for the unhoused

Direct partnerships with County Behavioral Health systems across CA (locally, Contra Costa County Behavioral Health (BH) and Alameda County BH) who serve Medi-Cal patients. This includes care coordination that addresses financial counseling, housing, transportation needs, individualized case management to address psychosocial needs, etc.

Direct relationships with Partial Hospitalization Program/Intensive Outpatient and residential programs across the state of CA, providing individualized care coordination to meet the patient at their appropriate level of care and needs

The Community Health Improvement program provides multi-year funding to partners working to address SDOH including food banks, shelters, day programs, and short-term housing for unhoused individuals, etc. We provide information and education to our community partners to help them address SDOH, for example, education to teachers at staff development days. Foundation events sponsor other organizations who support those living with mental illness.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

Overview

Providing evidence-based, timely, and appropriate mental health care for all patients.

Equity Considerations

Promote Clinical decision support tools and EBP pathways to reduce unconscious bias that could lead to disparities in treatment and outcomes.

Programs & Practices

Evidence-based practices are in place such as: Pathways to Recovery – Promotes person-centered, culturally responsive care and connects clients to community resources to reduce health disparities; Dialectical Behavioral Therapy Skills – Provides adaptable coping strategies that empower diverse populations to manage distress and build resilience; Stanley Brown Safety Plan – Offers a simple, collaborative crisis plan that is low-cost and accessible across settings.

Medication Management – Psychiatrists ensure equity by providing informed consent in understandable language, considering cultural beliefs and financial barriers, and collaborating on safe, individualized treatment. •

EHR alerts and provider education to close gaps in guideline-concordant care.

On-site Alcoholics Anonymous and Narcotics Anonymous

Improvements & Plans

Continuous improvement and quality assurance plans ongoing and monitored quarterly include: Seclusion and Restraint, Expressive Arts Therapy, Social Services, Nutrition Services, Master treatment plans for inpatient and outpatient. Ongoing, quarterly monitoring

Community Partnerships

We are engaged in many community partnerships. Some examples are:

The Mental Health Connection promotes reducing health disparities for those living with mental illness.

The Miles Hall Foundation promotes reducing health disparities across race and those living with mental illness

The Monument Crisis Center and Shelter Inc. work to reduce health disparities for the unhoused
Direct partnerships with County Behavioral Health systems across CA (locally, Contra Costa County Behavioral Health (BH) and Alameda County BH) who serve Medi-Cal patients. This includes care coordination that addresses financial counseling, housing, transportation needs, individualized case management to address psychosocial needs, etc.

Direct relationships with Partial Hospitalization Program/Intensive Outpatient and residential programs across the state of CA, providing individualized care coordination to meet the patient at their appropriate level of care and needs

Care coordination

Overview

Ensuring care is organized across providers, settings, and time for all populations.

Equity Considerations

Special focus on transitions for all mental health patients who are all vulnerable, including inpatient and outpatient mental health and psychiatric services, and resources for unhoused and those experiencing other disparities. All psychiatric patients have a multidisciplinary care team with ongoing care planning.

Programs & Practices

Social work consults are completed for all identified unhoused patients to ensure appropriate resources are provided, including but not limited to medical follow-up, clothing, transportation, mental health support, and a meal prior to discharge.

Discharge Planning – Social Workers involve individuals and appropriate contact persons in decisions, addressing social determinants and connecting to community supports for continuity and fairness. All discharging patients have access to aftercare, regardless of payer status.

Charity Care funds are available for patients without financial means or insurance coverage to support needs such as medications, durable medical equipment, and transportation.

Community Partners

Direct partnerships with County Behavioral Health systems across CA (locally, Contra Costa County Behavioral Health (BH) and Alameda County BH) who serve Medi-Cal patients. This includes care coordination that addresses financial counseling, housing, transportation needs, individualized case

management to address psychosocial needs, etc.

Direct relationships with Partial Hospitalization Program/Intensive Outpatient and residential programs across the state of CA, providing individualized care coordination to meet the patient at their appropriate level of care and needs

Local Community Partners that provide resources support (non-treatment providers) to patients discharging from the Acute Psychiatric Hospitals include (but not limited to) Mental Health Connections, Miles Hall Foundation, Monument Crisis Center, Shelters Inc, Trinity Center.

Access to care

Overview

Ensuring patients can obtain timely, culturally appropriate services without barriers.

Equity Considerations

Addressing insurance, income, and health literacy gaps to improve access for vulnerable populations.

Programs & Practices

Provide access into the Acute Psychiatric Hospital for all patients in need of emergent care, regardless of ability to pay

Created Discharge Clinical Pathway to include standard process re: how to assess for patients' psychosocial needs, provide individualized care using evidenced based practices, provide education about mental health and community resources to patients and families, and provide aftercare within 7 days of discharge for all patients, regardless of payer source.

Social Work groups once per day per unit addresses how to create a safety plan and discharge plan that includes access to the appropriate level of care, based on patients' needs and insurance/resources. Provides education to address insurance, income, and health literacy gaps to improve access for vulnerable populations.

Social Work coordination of care includes individualized communication with patients, families, aftercare providers and agencies to secure appropriate access to care based on each patient's psychosocial needs.

Mobile health clinic provides primary care to uninsured and underinsured patients in East and Central Contra County

Specialty care program: partnership with each County Behavioral Health across CA.

Provide discharge transportation as needed for patients who are unable to secure own transportation

Performance Data

Overall Readmission rates outperform the benchmark, remaining consistently under 5% (benchmark is under 10%)

Payer sources consistently provide reports that we outperform the benchmarks for patients who are provided appointments within 7 days of discharge and who attend appointments within 30 days of discharge.

Improvements & Plans

Target average length of stay of 6-7 days in Acute Psychiatric Treatment, to include coordination of care and access to treatment to prevent life threatening behaviors and reduce readmissions.

More access to care within Acute Psych Hospital by providing safety interventions to reduce blocked beds

Community Partnerships

We are engaged in many community partnerships. Some examples are:

The Mental Health Connection promotes reducing health disparities for those living with mental illness.

The Miles Hall Foundation promotes reducing health disparities across race and those living with mental illness

The Monument Crisis Center and Shelter Inc. work to reduce health disparities for the unhoused Direct partnerships with County Behavioral Health systems across CA (locally, Contra Costa County Behavioral Health (BH) and Alameda County BH) who serve Medi-Cal patients. This includes care coordination that addresses financial counseling, housing, transportation needs, individualized case management to address psychosocial needs, etc.

Direct relationships with Partial Hospitalization Program/Intensive Outpatient and residential programs across the state of CA, providing individualized care coordination to meet the patient at their appropriate level of care and needs

Local Community Partners that provide resources support (non-treatment providers) to patients discharging from the Acute Psychiatric Hospitals include (but not limited to) Mental Health Connections, Miles Hall Foundation, Monument Crisis Center, Shelters Inc, Trinity Center.

Methodology Guidelines

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)

Y
