

Hospital Equity Measures Report

General Information

| | |
|---|--|
| Report Type: | Hospital Equity Measures Report |
| Year: | 2024 |
| Hospital Name: | COMMUNITY HOSPITAL OF HUNTINGTON PARK |
| Facility Type: | General Acute Care Hospital |
| Hospital HCAI ID: | 106190197 |
| Report Period: | 01/01/2024 - 12/31/2024 |
| Status: | Complete |
| Due Date: | 11/29/2025 |
| Last Updated: | 01/17/2026 |
| Hospital Location with Clean Water and Air: | Y |
| Hospital Web Address for Equity Report: | www.communityhospitalhp.com |

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

General acute care hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce-health-care-disparities/>

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

39468

Table 1. Summary of preferred languages reported by patients.

| Languages | Number of patients who report preferring language | Total number of patients | Percentage of total patients who report preferring language (%) |
|----------------------------------|---|--------------------------|---|
| English Language | 18779 | 39468 | 47.6 |
| Spanish Language | 20543 | 39468 | 52 |
| Asian Pacific Islander Languages | 62 | 39468 | 0.2 |
| Middle Eastern Languages | Suppressed | 39468 | Suppressed |
| American Sign Language | Suppressed | 39468 | Suppressed |
| Other Languages | 76 | 39468 | 0.2 |

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a general acute care hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:

<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

Y

CMS HCHE Measure Domain 2: Data Collection (Yes/No)

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health information.

- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

Y

CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

Y

CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

Y

CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

Y

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

General acute care hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

732

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

2857

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

25.6

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

| Social Driver of Health | Number of positive screenings | Rate of positive screenings (%) | Number of positive screenings who received intervention | Rate of positive screenings who received intervention (%) |
|-------------------------|-------------------------------|---------------------------------|---|---|
| Food Insecurity | 38 | 5.2 | | |
| Housing Instability | 69 | 9.4 | | |
| Transportation Problems | 60 | 8.2 | | |
| Utility Difficulties | 27 | 3.7 | | |
| Interpersonal Safety | Suppressed | Suppressed | | |

Core Quality Measures for General Acute Care Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, general acute care hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

257

Total number of respondents to HCAHPS Question 19

292

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

88

Total number of people surveyed on HCAHPS Question 19

305

Response rate, or the percentage of people who responded to HCAHPS Question 19

95.7

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|--|---------------------------|---|-----------------------------------|--|
| American Indian or Alaska Native | Suppressed | Suppressed | Suppressed | | |
| Asian | Suppressed | Suppressed | Suppressed | | |
| Black or African American | 21 | 26 | 80.8 | | |
| Hispanic or Latino | 123 | 139 | 88.5 | | |
| Middle Eastern or North African | | | | | |
| Multiracial and/or Multiethnic (two or more races) | | | | | |
| Native Hawaiian or Pacific Islander | Suppressed | Suppressed | Suppressed | | |
| White | Suppressed | Suppressed | Suppressed | | |

| Age | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------------------|--|---------------------------|---|-----------------------------------|--|
| Age < 18 | | | | | |
| Age 18 to 34 | Suppressed | Suppressed | Suppressed | Suppressed | Suppressed |
| Age 35 to 49 | 37 | 40 | 92.5 | 40 | 100 |
| Age 50 to 64 | 82 | 94 | 87.2 | 98 | 95.9 |
| Age 65 Years and Older | 129 | 145 | 89 | 154 | 94.2 |

| Sex assigned at birth | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-----------------------|--|---------------------------|---|-----------------------------------|--|
| Female | 123 | 136 | 90.4 | 144 | 94.4 |
| Male | 134 | 156 | 85.9 | 161 | 96.9 |
| Unknown | | | | | |

| Payer Type | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------|--|---------------------------|---|-----------------------------------|--|
| Medicare | 74 | 83 | 89.2 | 88 | 94.3 |
| Medicaid | 163 | 187 | 87.2 | 195 | 95.9 |
| Private | 14 | 16 | 87.5 | 16 | 100 |
| Self-Pay | Suppressed | Suppressed | Suppressed | Suppressed | Suppressed |
| Other | Suppressed | Suppressed | Suppressed | Suppressed | Suppressed |

| Preferred Language | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|----------------------------------|--|---------------------------|---|-----------------------------------|--|
| English Language | 61 | 81 | 75.3 | 84 | 96.4 |
| Spanish Language | 195 | 210 | 92.9 | 220 | 95.5 |
| Asian Pacific Islander Languages | Suppressed | Suppressed | Suppressed | Suppressed | Suppressed |
| Middle Eastern Languages | | | | | |
| American Sign Language | | | | | |
| Other/Unknown Languages | | | | | |

| Disability Status | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--------------------------------------|---|----------------------------------|--|--|---|
| Does not have a disability | | | | | |
| Has a mobility disability | | | | | |
| Has a cognition disability | | | | | |
| Has a hearing disability | | | | | |
| Has a vision disability | | | | | |
| Has a self-care disability | | | | | |
| Has an independent living disability | | | | | |

| Sexual Orientation | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|----------------------------|---|----------------------------------|--|--|---|
| Lesbian, gay or homosexual | | | | | |
| Straight or heterosexual | | | | | |
| Bisexual | | | | | |
| Something else | | | | | |
| Don't know | | | | | |
| Not disclosed | | | | | |

| Gender Identity | Number of "probably yes" or "definitely yes" responses | Total number of responses | Percent of "probably yes" or "definitely yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|---|----------------------------------|--|--|---|
| Female | | | | | |
| Female-to-male (FTM)/ transgender male/trans man | | | | | |
| Male | | | | | |
| Male-to-female (MTF)/ transgender female/trans | | | | | |
| Non-conforming gender | | | | | |
| Additional gender category or other | | | | | |
| Not disclosed | | | | | |

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. General acute care hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

234

Total number of respondents to HCAHPS Question 17

268

Percentage of respondents who responded "yes" to HCAHPS Question 17

87.3

Total number of people surveyed on HCAHPS Question 17

305

Response rate, or the percentage of people who responded to HCAHPS Question 17

87.9

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|---|----------------------------------|----------------------------------|--|--|---|
| American Indian or Alaska Native | Suppressed | Suppressed | Suppressed | | |
| Asian | Suppressed | Suppressed | Suppressed | | |
| Black or African American | 18 | 21 | 85.7 | | |
| Hispanic or Latino | 116 | 131 | 88.5 | | |
| Middle Eastern or North African | | | | | |
| Multiracial and/or Multiethnic (two or more races) | | | | | |
| Native Hawaiian or Pacific Islander | Suppressed | Suppressed | Suppressed | | |
| White | Suppressed | Suppressed | Suppressed | | |

| Age | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-------------------------------|----------------------------------|----------------------------------|--|--|---|
| Age < 18 | | | | | |
| Age 18 to 34 | Suppressed | Suppressed | Suppressed | Suppressed | Suppressed |
| Age 35 to 49 | 36 | 39 | 92.3 | 40 | 97.5 |
| Age 50 to 64 | 73 | 87 | 83.9 | 98 | 88.8 |
| Age 65 Years and Older | 116 | 131 | 88.5 | 154 | 85.1 |

| Sex assigned at birth | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|------------------------------|----------------------------------|----------------------------------|--|--|---|
| Female | 109 | 127 | 85.8 | 144 | 88.2 |
| Male | 125 | 141 | 88.7 | 161 | 87.6 |
| Unknown | | | | | |

| Payer Type | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-------------------|----------------------------------|----------------------------------|--|--|---|
| Medicare | 71 | 80 | 88.8 | 88 | 90.9 |
| Medicaid | 143 | 167 | 85.6 | 195 | 85 |

| Middle Eastern Languages | | | | | |
| American Sign | | | | | |
| Other/Unknown Languages | | | | | |

| Disability Status | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|---|----------------------------------|----------------------------------|--|--|---|
| Does not have a disability | | | | | |
| Has a mobility disability | | | | | |
| Has a cognition | | | | | |
| Has a hearing disability | | | | | |
| Has a vision disability | | | | | |
| Has a self-care | | | | | |
| Has an independent living disability | | | | | |

| Sexual Orientation | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|-----------------------------------|----------------------------------|----------------------------------|--|--|---|
| Lesbian, gay or homosexual | | | | | |
| Straight or heterosexual | | | | | |
| Bisexual | | | | | |
| Something else | | | | | |
| Don't know | | | | | |
| Not disclosed | | | | | |

| Gender Identity | Number of "yes" responses | Total number of responses | Percentage of "yes" responses (%) | Total number of patients surveyed | Response rate of patients surveyed (%) |
|--|---------------------------|---------------------------|-----------------------------------|-----------------------------------|--|
| Female | | | | | |
| Female-to-male (FTM)/ transgender male/trans man | | | | | |
| Male | | | | | |
| Male-to-female (MTF)/ transgender female/trans woman | | | | | |
| Non-conforming gender | | | | | |
| Additional gender category or other | | | | | |
| Not disclosed | | | | | |

Agency for Healthcare Research and Quality (AHRQ) Indicators

General acute care hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:
<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. General acute care hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:
https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

Suppressed

Death Rate among Surgical Inpatients with Serious Treatable Complications

The Death Rate among Surgical Inpatients with Serious Treatable Complications is defined as the rate of in-hospital deaths per 1,000 surgical discharges among patients ages 18-89 years old or obstetric patients with serious treatable complications. General acute care hospitals report this measure by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Patient Safety Indicator is 04. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

<https://qualityindicators.ahrq.gov/Downloads/Modules/PSI/V2023/TechSpecs/>

California Maternal Quality Care Collaborative (CMQCC) Core Quality Measures

There are three core quality maternal measures adopted from the California Maternal Quality Care Collaborative (CMQCC).

CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate

The CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate is defined as nulliparous women with a term (at least 37 weeks gestation), singleton baby in a vertex position delivered by cesarian birth. General acute care hospitals report the NTSV Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cmqcc.org/quality-improvement-toolkits/supporting-vaginal-birth/ntsv-cesarean-birth-measure-specifications>

Number of NTSV patients with Cesarean deliveries

NA

Total number of nulliparous NTSV patients

NA

Rate of NTSV patients with Cesarean deliveries

NA

Table 7. Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of NTSV patients with cesarean deliveries | Total number of NTSV patients | Rate of NTSV patients with Cesarean deliveries (%) |
|--|---|--------------------------------------|---|
| American Indian or Alaska Native | | | |
| Asian | | | |
| Black or African American | | | |
| Hispanic or Latino | | | |
| Middle Eastern or North African | | | |
| Multiracial and/or Multiethnic (two or more races) | | | |
| Native Hawaiian or Pacific Islander | | | |
| White | | | |
| Age | Number of NTSV patients with cesarean deliveries | Total number of NTSV patients | Rate of NTSV patients with Cesarean deliveries (%) |
| Age < 18 | | | |
| Age 18 to 29 | | | |
| Age 30 to 39 | | | |
| Age 40 Years and Older | | | |

| Male-to-female (MTF)/transgender female/trans woman | | | |
| Non-conforming gender | | | |
| Additional gender category or other | | | |
| Not disclosed | | | |

CMQCC Vaginal Birth After Cesarean (VBAC) Rate

The CMQCC Vaginal Birth After Cesarean (VBAC) Rate is defined as vaginal births per 1,000 deliveries by patients with previous Cesarean deliveries. General acute care hospitals report the VBAC Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The VBAC Rate uses the specifications of AHRQ Inpatient Quality Indicator 22. For more information, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_\(VBAC\)_Delivery_Rate_Uncomplicated.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_(VBAC)_Delivery_Rate_Uncomplicated.pdf)

Number of vaginal delivery among cases with previous Cesarean delivery that meet the inclusion and exclusion criteria

NA

Total number of birth discharges with previous Cesarean delivery that meet the inclusion and exclusion criteria

NA

Rate of vaginal delivery per 1,000 deliveries by patients with previous Cesarean deliveries

NA

| Not disclosed | | | |

CMQCC Exclusive Breast Milk Feeding Rate

The CMQCC Exclusive Breast Milk Feeding Rate is defined as the newborns per 100 who reached at least 37 weeks of gestation (or 3000g if gestational age is missing) who received breast milk

exclusively during their stay at the hospital. Other criteria are that the newborns did not go to the neonatal intensive care unit (NICU), transfer, or die, did not reflect multiple gestation, and did not have codes for parenteral nutrition or galactosemia. General acute care hospitals report the Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The CMQCC Exclusive Breast Milk Feeding Rate uses the Joint Commission National Quality Measure PC-05. For more information, please visit the following link by copying and pasting the URL into your web browser: <https://manual.jointcommission.org/releases/TJC2024B/MIF0170.html>

Number of newborn cases that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

NA

Total number of newborn cases born in the hospital that meet the inclusion and exclusion criteria

NA

Rate of newborn cases per 100 that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

NA

Table 9. Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of newborn cases that were exclusively breastfed and meet inclusion/exclusion criteria | Total number of newborn cases born in the hospital that meet inclusion/exclusion criteria | Rate of newborn cases per 100 that were exclusively breastfed and met inclusion/exclusion criteria (%) |
|--|---|---|--|
| American Indian or Alaska Native | | | |
| Asian | | | |
| Black or African American | | | |

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

General acute care hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate – Any Eligible Condition

Number of inpatient hospital admissions which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

270

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

1363

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

19.8

Table 10. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate for any eligible condition by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of inpatient readmissions | Total number of admitted patients | Readmission rate (%) |
|---|---|--|-----------------------------|
| American Indian or Alaska Native | Suppressed | Suppressed | Suppressed |
| Asian | Suppressed | Suppressed | Suppressed |
| Black or African American | 53 | 196 | 27 |
| Hispanic or Latino | 199 | 1051 | 18.9 |

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate - No Behavioral Health Diagnosis

Number of inpatient hospital admissions which occurs within 30 days of the discharge date with no behavioral diagnosis and were 18 years or older at time of admission

Suppressed

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

Suppressed

Rate of hospital-level, unplanned, all-cause readmissions after admission with no behavioral diagnosis within 30 days of hospital discharge for patients aged 18 and older

Suppressed

Table 14. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate with No Behavioral Diagnosis by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

| Race and/or Ethnicity | Number of inpatient readmissions | Total number of admitted patients | Readmission rate (%) |
|--|---|--|-----------------------------|

Health Equity Plan

All general acute care hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 15. Top 10 disparities and their rate ratio values.

| Measures | Stratifications | Stratification Group | Stratification Rate | Reference Group | Reference Rate | Rate Ratio |
|---|-----------------------------------|---------------------------|---------------------|--------------------|----------------|------------|
| Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey: Would recommend hospital. | Preferred Language | English Language | 75.3 | Spanish Language | 92.9 | 1.2 |
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate | Race and/or Ethnicity | Black or African American | 27 | Hispanic or Latino | 18.9 | 1.4 |
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate | Preferred Language | English Language | 22.9 | Spanish Language | 17.1 | 1.3 |
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate | Age (excluding maternal measures) | 35 to 49 | 21.2 | 18 to 34 | 15.1 | 1.4 |
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate | Age (excluding maternal measures) | 50 to 64 | 18.6 | 18 to 34 | 15.1 | 1.2 |
| HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate | Age (excluding maternal measures) | 65 and older | 21 | 18 to 34 | 15.1 | 1.4 |

Plan to address disparities identified in the data

Community Hospital of Huntington Park will address the six identified disparities through a coordinated, equity-focused improvement strategy aimed at strengthening communication, enhancing discharge processes, and improving care transitions for high-risk populations. Key initiatives include standardizing teach-back and plain-language education for all patients, implementing payer- and age-stratified dashboards to support operational decision-making, and integrating the Elixhauser comorbidity index into case management huddles to proactively identify high-risk patients. The hospital will expand pharmacist-led medication reconciliation for older adults, increase caregiver engagement, and enhance screening for social needs that contribute to higher readmission risk. Through measurable objectives, quarterly monitoring, interdisciplinary collaboration, and focused staff training, the hospital will systematically reduce disparities in patient experience and readmissions—ensuring that all patients, regardless of language, age, or demographic background, receive clear, coordinated, and equitable care.

Performance in the priority area

General acute care hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

The disparities in patient experience—particularly the lower “Would Recommend Hospital” scores among English-preferring patients—indicate opportunities to strengthen person-centered care practices across the organization. These findings suggest variation in communication clarity, perceived attentiveness, and cultural responsiveness based on patients’ language preference. Improving the consistency of patient engagement, expanding teach-back, enhancing emotional support, and tailoring communication to diverse expectations will help ensure all patients feel respected, informed, and confident in their care. Addressing these differences in experience is

critical to improving trust, satisfaction, and overall perceptions of quality within the communities served.

Patient safety

Readmission disparities across multiple groups—including Black or African American patients, English-preferring patients, and adults across all age brackets above 35—highlight patient safety concerns related to care transitions, medication understanding, and symptom management. These patterns indicate inconsistent discharge practices, limited access to timely follow-up care, and variable comprehension of clinical instructions. High readmission rates signal risks related to incomplete information, poor self-management readiness, and gaps in continuity of care. Strengthening standardized education workflows, improving risk screening, and reinforcing post-discharge follow up will be essential for reducing preventable harm and improving safety outcomes for these populations.

Addressing patient social drivers of health

The identified disparities point to underlying social drivers—including transportation limitations, unstable housing, chronic disease burden, and inconsistent caregiver support—that disproportionately affect Black/African American patients and middle-aged and older adults. English-preferring patients also appear to face challenges with health literacy and navigating the healthcare system. These inequities often influence the ability to obtain medications, attend follow-up appointments, and manage chronic conditions effectively. Expanding social needs screening, community resource referrals, and collaborations with community-based organizations will be critical to addressing these underlying factors and reducing readmissions among high-risk populations.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

Higher readmission rates among English-preferring patients and adults ages 35–49, 50–64, and 65+ suggest variability in treatment adherence, chronic disease management, and understanding of care instructions. Patients may not be receiving consistent medication reconciliation, caregiver-inclusive teaching, or clear guidance on recognizing worsening symptoms. These gaps can compromise treatment effectiveness and lead to avoidable return visits. Improving care pathways, enhancing patient teaching, and leveraging pharmacy for medication reconciliation for older adults will help ensure that treatment is effective, safe, and sustainable across all populations.

Care coordination

Care coordination challenges are strongly reflected in the readmission disparities. Limited post-discharge contact, inconsistent scheduling of follow-up appointments, and insufficient linkage to primary or specialty care disproportionately affect Black/African American patients, English-preferring patients, and older adults with complex chronic conditions. Improvements are needed in communication between inpatient and outpatient teams, proactive follow-up, and integration of social work and case management into discharge planning. Strengthening care transition workflows will be essential to improving continuity and reducing preventable readmissions for these groups.

Access to care

While access measures are not directly represented in the disparities, the readmission patterns suggest barriers to timely and coordinated outpatient care. These barriers are particularly evident among older adults and Black/African American patients, who may face longer wait times, limited availability of follow-up appointments, or transportation challenges. Lower experience scores from English-preferring patients may indicate access-related concerns such as difficulty navigating

services or understanding how to obtain needed care. Strategies that improve scheduling support, navigation services, and access to community-based resources will help ensure more equitable access to care across all patient groups.

Methodology Guidelines

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)
