

Hospital Equity Measures Report

General Information

Report Type:	Hospital Equity Measures Report
Year:	2024
Hospital Name:	DAMERON HOSPITAL
Facility Type:	General Acute Care Hospital
Hospital HCAI ID:	106390846
Report Period:	1/1/2024 - 12/31/2024
Status:	Final Review
Due Date:	11/29/2025
Last Updated:	03/17/2026
Hospital Location with Clean Water and Air:	Y
Hospital Web Address for Equity Report:	https://res.cloudinary.com/dpmkpsih/image/upload/dameron-ho

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

General acute care hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce>

-health-care-disparities/

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

48387

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	43505	48387	89.9
Spanish Language	4125	48387	8.5
Asian Pacific Islander Languages	645	48387	1.3
Middle Eastern Languages	50	48387	0.1
American Sign Language	13	48387	0.0
Other Languages	49	48387	0.1

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a general acute care hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:
<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

Y

CMS HCHE Measure Domain 2: Data Collection (Yes/No)

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health

information.

- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

Y

CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

Y

CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

Y

CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

Y

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

General acute care hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

0

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

0

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

0

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity	0	0	0	0
Housing Instability	0	0	0	0
Transportation Problems	0	0	0	0
Utility Difficulties	0	0	0	0
Interpersonal Safety	0	0	0	0

Core Quality Measures for General Acute Care Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, general acute care hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

293

Total number of respondents to HCAHPS Question 19

318

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

92.1

Total number of people surveyed on HCAHPS Question 19

323

Response rate, or the percentage of people who responded to HCAHPS Question 19

98.5

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)

Male					
Male-to-female (MTF)/ transgender female/trans					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. General acute care hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

230

Total number of respondents to HCAHPS Question 17

286

Percentage of respondents who responded "yes" to HCAHPS Question 17

80.4

Total number of people surveyed on HCAHPS Question 17

323

Response rate, or the percentage of people who responded to HCAHPS Question 17

88.5

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Agency for Healthcare Research and Quality (AHRQ) Indicators

General acute care hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:
<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. General acute care hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:
https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Death Rate among Surgical Inpatients with Serious Treatable Complications

The Death Rate among Surgical Inpatients with Serious Treatable Complications is defined as the rate of in-hospital deaths per 1,000 surgical discharges among patients ages 18-89 years old or obstetric patients with serious treatable complications. General acute care hospitals report this measure by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Patient Safety Indicator is 04. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

California Maternal Quality Care Collaborative (CMQCC) Core Quality Measures

There are three core quality maternal measures adopted from the California Maternal Quality Care Collaborative (CMQCC).

CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate

The CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate is defined as nulliparous women with a term (at least 37 weeks gestation), singleton baby in a vertex position delivered by cesarian birth. General acute care hospitals report the NTSV Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information, please visit the following link by copying and pasting the URL into your web browser:

CMQCC Vaginal Birth After Cesarean (VBAC) Rate

The CMQCC Vaginal Birth After Cesarean (VBAC) Rate is defined as vaginal births per 1,000 deliveries by patients with previous Cesarean deliveries. General acute care hospitals report the VBAC Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The VBAC Rate uses the specifications of AHRQ Inpatient Quality Indicator 22. For more information, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_\(VBAC\)_Delivery_Rate_Uncomplicated.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_(VBAC)_Delivery_Rate_Uncomplicated.pdf)

CMQCC Exclusive Breast Milk Feeding Rate

The CMQCC Exclusive Breast Milk Feeding Rate is defined as the newborns per 100 who reached at least 37 weeks of gestation (or 3000g if gestational age is missing) who received breast milk

exclusively during their stay at the hospital. Other criteria are that the newborns did not go to the neonatal intensive care unit (NICU), transfer, or die, did not reflect multiple gestation, and did not have codes for parenteral nutrition or galactosemia. General acute care hospitals report the Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The CMQCC Exclusive Breast Milk Feeding Rate uses the Joint Commission National Quality Measure PC-05. For more information, please visit the following link by copying and pasting the URL into your web browser: <https://manual.jointcommission.org/releases/TJC2024B/MIF0170.html>

Number of newborn cases that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

General acute care hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate – Any Eligible Condition

Number of inpatient hospital admissions which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

186

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

1870

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

Health Equity Plan

All general acute care hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 15. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Race and/or Ethnicity	Native Hawaiian or Pacific Islander	3.6	Native Hawaiian or Pacific Islander	0.2	18
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)	65 and older	4.9	18 to 34	0.6	8.2
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (Substance Use Disorder)	Sex Assigned at Birth	Female	8.0	Male	4.0	2.0

Plan to address disparities identified in the data

Reduce disparities in readmission rates among:

- patients with No Behavioral Health Diagnosis
- vR cR æB öÆFW
- patients with Substance Use Disorders (SUD)

1. Data Analysis & Risk Stratification

- 6VvÖVçB F–VçG2 y age, behavioral health status, and comorbidities.
- W6R &VF–7F—`e analytics to identify high-risk individuals before discharge.

2. Tailored Interventions

For No Behavioral Health Diagnosis

- Focus on medical complexity and social determinants (transportation, food security).
- 66†VGVÆR Follow-up care appointments prior to discharge.
- For uninsured and/or patients with no primary care provider work with Community Health Center to secure follow-up care

For Age 65+

- –x ÆVÖVçB 6öx &V†Vç6—`e discharge planning with medication reconciliation.
- 7&V FR æB –x ÆVÖVçB –æF—f–GV Æ— ed easy to follow discharge instruction packet
- &övide home health referrals, fall prevention education, and caregiver support.
- 66†VGVÆR V ly post-discharge follow-up (within 7 days).

For Substance Use Disorders

- –çFVprate addiction specialists into care teams.
- öfer referral/linkage to community recovery resources.
- Vç7W&R 6 `e medication management and overdose prevention education.

3. Care Coordination

- 76–vâ 6 6R Ö æ vW'2 `or high-risk patients.
- W6R VÆV7G&öæ–2 †V ÇF, &V6÷&B ÆW ts to flag patients needing extra support.
- 7G&VæwF†Vâ 6öÖöunication between inpatient, outpatient, and community providers.

4. Patient Education & Engagement

- W6R FV 6,Ö& 0k methods to confirm understanding of discharge instructions.
- &övide multilingual resources and culturally sensitive education.

5. Community Partnerships

- "6öÆÆ &÷ ate with local agencies, senior centers, and behavioral health organizations.
- "6ö÷&F—æ FR G ansportation assistance and home visit programs through available insurance programs.

6. Measurement & Continuous Improvement

- @rack readmission rates by subgroup quarterly.
- "6öæGV7B &ö÷B 6 W6R æ Ç—6—2 `or any persistent disparities.
- 6† &R &öpress with staff and community stakeholders.

Performance in the priority area

General acute care hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

At Dameron Hospital, we are committed to delivering care that honors the dignity, values, and unique needs of every individual. Our approach places patients and their families at the heart of every decision, ensuring that care is respectful, compassionate, and tailored to each person's preferences, culture, and goals. We strive to create a healing environment where collaboration, transparency, and trust guide our interactions, empowering patients to actively participate in their health journey. Through continuous improvement and a holistic focus on mind, body, and spirit, we aim to provide exceptional care that promotes well-being and strengthens our community. We have formed a multidisciplinary health equity team to lead our efforts surrounding diversity, equity and inclusion. Health equity training is provided to all employees to ensure staff are equipped with skills essential to provide cultural humility.

Patient safety

At Dameron Hospital, patient safety is our highest priority. We are committed to providing care in an environment that minimizes risk and promotes the well-being of every individual. Our safety program is built on evidence-based practices, continuous staff education, and rigorous adherence to national standards. We implement comprehensive protocols, including safe surgery checklists, infection prevention measures, and fall reduction strategies, to protect patients at every stage of care. Through transparent reporting, ongoing performance improvement, and a culture of accountability, we strive to ensure that every patient receives safe, high-quality care. Our goal is simple: zero preventable harm and the highest level of trust from those we serve.

Addressing patient social drivers of health

Dameron Hospital recognizes that health outcomes are deeply influenced by social, economic, and environmental factors. We are committed to identifying and addressing patients' social drivers of health—including access to nutritious food, stable housing, transportation, financial security, and social support—through a comprehensive, person-centered approach. Our care teams will integrate SDOH screening into clinical workflows, connect patients to community resources, and collaborate with local organizations to reduce barriers to care. By fostering partnerships and leveraging data-driven strategies, we aim to promote equity, improve health outcomes, and support the overall well-

being of every individual we serve.

We have a partnership with Red Rabbit, a local non-profit that supports homeless and those with housing insecurity. Dameron Hospital provides both food and financial support to Red Rabbit. Dameron Hospital Provides interpreter services to ensure communication in patient preferred language.

Dameron Hospital is compliant with Senate Bill 1152 to ensure needs for transportation, weather appropriate clothing, provision of a meal, and medications are offered to those experiencing homelessness or housing insecurity.

Dameron Hospital offers a Meds-to Beds program in ensure discharged patients have necessary medications at time on discharge.

Dameron Hospital has a full-time substance abuse counselor who provides follow-up and appropriate referral for patient experiencing substance abuse.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

Dameron Hospital delivers effective treatment by combining advanced medical technology with evidence-based practices and compassionate care. Our skilled team works collaboratively to ensure accurate diagnosis, timely interventions, and personalized treatment plans that promote the best possible outcomes for every patient.

Care coordination

Dameron Hospital ensures seamless care coordination by connecting patients, families, and healthcare teams throughout every stage of treatment. We collaborate across specialties, share vital information, and provide personalized support to make transitions between care settings safe, efficient, and centered on each patient's needs.

Care management team schedules follow-up appointments at time of discharge. If patient does not have a primary care provide we are working with Community Care Center to obtain a primary care provider for patient. We are also coordinating transportation arrangements for follow-up care through available resources. We are providing necessary medications through our Meds-to-Beds program. We have streamlined our discharge paperwork to an easy to follow format for our elderly patients. We are providing referral pathways for community-based SDOH support needs.

Access to care

Dameron Hospital addresses access to care in the Stockton community through several key strategies:

1. Community Health Needs Assessment (CHNA) & Implementation Plan

- "F ÖW&öâ 6öæGV7G2 4,ä Pvery three years to identify barriers to care and prioritize solutions.
- "÷W" 6öÖDunity Health Implementation Strategy (CHIS) focuses on high-priority areas like access to care, financial stability, and mental health, developed in collaboration with local public health agencies, community organizations, and underserved populations.

2. Financial Assistance & Transparency

- "F†R †÷7 —F Â öf`ers financial assistance for medically necessary care, along with tools for pricing transparency and resources to help patients navigate billing and insurance.

3. Expanded Services & Technology

- "F ÖW&öâ &övides advanced services such as robotic-assisted surgery, cardiac care, and stroke care, reducing the need for patients to travel outside the area for specialized treatment.

4. Community Partnerships

- "porks with community-based organizations and local health officials to improve outreach and

education, ensuring underserved populations have access to preventive and acute care.

5. Emergency & Crisis Care

- “Ö –çF –ç2 VÖW&vVæ7’ &W &VFæW72 Æ ç2 æB 7 isis care guidelines to ensure timely access during disasters or public health emergencies.

Methodology Guidelines

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)

Y
