

# Hospital Equity Measures Report

## General Information

Report Type:	Hospital Equity Measures Report
Year:	2024
Hospital Name:	RIVER VISTA BEHAVIORAL HEALTH
Facility Type:	Acute Psychiatric Hospital
Hospital HCAI ID:	106200030
Report Period:	1/1/2024 - 12/31/2024
Status:	Complete
Due Date:	11/29/2025
Last Updated:	03/06/2026
Hospital Location with Clean Water and Air:	Y
Hospital Web Address for Equity Report:	RIVERVISTABH.COM

## Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

## Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

[https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill\\_id=202120220AB1204](https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204)

## Hospital Equity Measures

### Joint Commission Accreditation

Acute psychiatric hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce>

-health-care-disparities/

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/ unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/ unknown languages category.

1437

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	1390	1437	96.7
Spanish Language	42	1437	2.9
Asian Pacific Islander Languages	suppressed	1437	suppressed
Middle Eastern Languages	suppressed	1437	suppressed
American Sign Language	0	1437	0.0
Other Languages	0	1437	0.0

**Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure**

There are five domains that make up the CMS Hospital Commitment to HCHE measures. Each domain is scored as "yes" or "no." In order to score "yes," a acute psychiatric hospital is required to confirm all the domain's attestations. Lack of one or more of the attestations results in a score of "no." For more information on the CMS Hospital Commitment to HCHE measures, please visit the following link by copying and pasting the URL into your web browser:

<https://data.cms.gov/provider-data/topics/hospitals/health-equity>

**Centers for Medicare & Medicaid Services (CMS) Hospital Commitment to Health Equity Structural (HCHE) Measure Domain 1: Strategic Planning (Yes/No)**

- Our hospital strategic plan identifies priority populations who currently experience health disparities.
- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.
- Our hospital strategic plan outlines specific resources that have been dedicated to achieving our equity goals.
- Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.

Y

**CMS HCHE Measure Domain 2: Data Collection (Yes/No)**

- Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieve these goals.

- Our hospital has training for staff in culturally sensitive collection of demographics and/or social determinant of health information.
- Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified electronic health record (EHR) technology.

Y

### CMS HCHE Measure Domain 3: Data Analysis (Yes/No)

- Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information in hospital performance dashboards.

Y

### CMS HCHE Measure Domain 4: Quality Improvement (Yes/No)

- Our hospital participates in local, regional or national quality improvement activities focused on reducing health disparities.

Y

### CMS HCHE Measure Domain 5: Leadership Engagement (Yes/No)

- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.
- Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually review key performance indicators stratified by demographic and/or social factors.

Y

## Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

Acute psychiatric hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser: <https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

1350

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

1437

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs

93.9

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity	417	30.9	417	30.9
Housing Instability	293	21.7	293	21.7
Transportation Problems	575	42.6	575	42.6
Utility Difficulties	146	10.8	146	10.8
Interpersonal Safety	512	37.9	512	37.9

## Core Quality Measures for General Acute Psychiatric Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:

<https://hcahpsonline.org/en/survey-instruments/>

### Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, acute psychiatric hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

732

Total number of respondents to HCAHPS Question 19

1009

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

72.5

Total number of people surveyed on HCAHPS Question 19

1437

Response rate, or the percentage of people who responded to HCAHPS Question 19

70.2

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

<b>Race and/or Ethnicity</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
<b>American Indian or Alaska Native</b>					
<b>Asian</b>					
<b>Black or African American</b>					
<b>Hispanic or Latino</b>					
<b>Middle Eastern or North African</b>					
<b>Multiracial and/or Multiethnic (two or more races)</b>					
<b>Native Hawaiian or Pacific Islander</b>					
<b>White</b>					

  

<b>Age</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
<b>Age &lt; 18</b>					
<b>Age 18 to 34</b>					
<b>Age 35 to 49</b>					
<b>Age 50 to 64</b>					
<b>Age 65 Years and Older</b>					

  

<b>Sex assigned at birth</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
<b>Female</b>					
<b>Male</b>					
<b>Unknown</b>					

  

<b>Payer Type</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
<b>Medicare</b>					
<b>Medicaid</b>					
<b>Private</b>					
<b>Self-Pay</b>					
<b>Other</b>					

  

<b>Preferred Language</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
<b>English Language</b>					
<b>Spanish Language</b>					
<b>Asian Pacific Islander Languages</b>					
<b>Middle Eastern Languages</b>					
<b>American Sign Language</b>					
<b>Other/Unknown Languages</b>					

<b>Disability Status</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Does not have a disability					
Has a mobility disability					
Has a cognition disability					
Has a hearing disability					
Has a vision disability					
Has a self-care disability					
Has an independent living disability					

  

<b>Sexual Orientation</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Lesbian, gay or homosexual					
Straight or heterosexual					
Bisexual					
Something else					
Don't know					
Not disclosed					

  

<b>Gender Identity</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Female					
Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans woman					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

## Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. Acute psychiatric hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

1437  
Total number of respondents to HCAHPS Question 17  
1437

Percentage of respondents who responded "yes" to HCAHPS Question 17  
0100

Total number of people surveyed on HCAHPS Question 17  
1437

Response rate, or the percentage of people who responded to HCAHPS Question 17  
0100

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					

Age	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					

Sex assigned at birth	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Male					
Unknown					

<b>Payer Type</b>	<b>Number of "yes" responses</b>	<b>Total number of responses</b>	<b>Percentage of "yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Medicare					
Medicaid					
Private					
Self-Pay					
Other

Other/Unknown Languages					

  

<b>Disability Status</b>	<b>Number of "yes" responses</b>	<b>Total number of responses</b>	<b>Percentage of "yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Does not have a disability					
Has a mobility disability					
Has a cognition disability					
Has a hearing disability					
Has a vision disability					
Has a self-care disability					
Has an independent living disability					

  

<b>Sexual Orientation</b>	<b>Number of "yes" responses</b>	<b>Total number of responses</b>	<b>Percentage of "yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>
Lesbian, gay or homosexual					
Straight or heterosexual					
Bisexual					
Something else					
Don't know					
Not disclosed					

Gender Identity	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans woman					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

## Agency for Healthcare Research and Quality (AHRQ) Indicators

Acute psychiatric hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:  
<https://qualityindicators.ahrq.gov/>

## Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. Acute psychiatric hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:  
[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI\\_20\\_Pneumonia\\_Mortality\\_Rate.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf)

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

0

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

0

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

0

## HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

Acute psychiatric hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser: [https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions\\_ADA.pdf](https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf)

**HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate in an Inpatient Psychiatric Facility (IPF)**

Number of inpatient admissions to an IPF which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission  
0

Total number of patients who were admitted to an IPF and were 18 years or older at time of admission  
0

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older  
0

Table 6. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate for any eligible condition by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

## CMS Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program Screening for Metabolic Disorders

Acute psychiatric hospitals are required to report the rate of structured screenings for metabolic disorders among patients with a prescription for one or more routinely scheduled antipsychotic medications. The structured screenings must contain (1) body mass index (BMI), (2) blood pressure, (3) blood glucose or HbA1c, and (4) a lipid panel, and be completed at least once in the 12 months prior to the patient's date of discharge. The rate of patient screenings for metabolic disorders are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the structured screenings for metabolic disorders, please see page 92 of the report by visiting the following link by copying and pasting the URL into your web browser:

## Health Equity Plan

All acute psychiatric hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

## Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 14. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio

Plan to address disparities identified in the data

1. The measure that shows the greatest disparity is the HCAHPS; Would recommend hospital.
2. The best performing reference group for this measure? HCAHPS Survey; received information and education
3. HCAHPS; would recommend Hospital.
4. The facility goal is to improve the net promotor score from 22.0 to 37.0 by 12/31/25. The facility implemented a new position Patient Experience Officer role to assist with complaints and grievances and mitigate any patient concerns. In addition, this role is responsible for meeting with individuals to share improvement in outcomes so that patients can see progress made during their hospital stay and also encourage patients to complete a patient satisfaction survey.

## Performance in the priority area

Acute psychiatric hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

#### Person-centered care

Through the data collection and reporting process for social and healthcare disparities, we have obtained knowledge regarding the needs of our patient population and the prevalence of these identified needs. The more common types of needs that resulted in decompensation leading to rehospitalizations were access to medications, housing, transportation to follow up care and nutritional support. Our facility offers step down outpatient services, preventative care for rehospitalizations that provides adequate care so patients don't have to be readmitted to higher acuity level of care. The hospital outpatient program provides transpiration and telehealth services, medication management while in the program, food is provided for patients who participate and assist with getting patients connected with individual therapy if group therapy is not preferred. As part of our discharge planning process for inpatient, we have a dedicated team of discharge planners who ensure our patients have a solid discharge plan to include follow up care, complete transition record, medication 30-day supplies and transportation to home, program, or shelter.

#### Patient safety

As part of the discharge process, all patients are required to complete a risk assessment ensuring the safety of the patient at time of discharge. each patient has a safety plan that is completed to include the number of the facility and support information and resources related to suicide prevention. Non-Access to lethal means is also completed and documented on the patient safety plan to ensure the patient is safely discharged home. the facility provides transportation to those in need and safety of the discharge location is confirmed.

#### Addressing patient social drivers of health

Through the data collection and reporting process for social and healthcare disparities, we have obtained knowledge regarding the needs of our patient population and the prevalence of these identified needs. The more common types of needs that resulted in decompensation leading to rehospitalizations were access to medications, housing, transportation to follow up care and nutritional support. Our facility offers step down outpatient services, preventative care for rehospitalizations that provides adequate care so patients don't have to be readmitted to higher acuity level of care. The hospital outpatient program provides transpiration and telehealth services, medication management while in the program, food is provided for patients who participate and assist with getting patients connected with individual therapy if group therapy is not preferred. As part of our discharge planning process for inpatient, we have a dedicated team of discharge planners who ensure our patients have a solid discharge plan to include follow up care, complete transition record, medication 30-day supplies and transportation to home, program, or shelter.

### **Performance in the priority area continued**

Performance across all of the following priority areas.

#### Effective treatment

the facility collects outcomes data using the basis 32 behavior and symptom scale, CABA-Y, Patient satisfaction and net promotor scores that demonstrates the facility effectiveness in treatment and the patient's level of satisfaction with services provided. 81% of our patients had a change score in

severity with 78% reporting statistically meaningful improvement. Our facility overall patient satisfaction score reported was 4.26 on a scale of 1 to 5. The facility 30-day readmission rate remains well below our target benchmark at a rate of 3.89. Patients who complete our satisfaction survey also complete the net promotor question for recommending this facility to those who are in need of care and services.

#### Care coordination

The social services department conducts a psychosocial assessment within the first 72 hours of admission to obtain collateral and identify friends or family members who can actively participate in the treatment of the patient. the care coordination. The facility also works with existing providers and county programs that the patient is already connected to and include this coordination as part of the plan of care from the admission to discharge process.

#### Access to care

The facility provides 24/7 access to inpatient services by offering assessments at the intake department on a referral or walk in basis. all patient are assessed to ensure the proper level of care to include admitting the patient to the hospital or referring the patient to our Partial Hospitalization or Intensive Outpatient Services. The facility works closely with community members and the department of Behavioral Health to promote its services and resources to the community. The facility also provides transportation services to those who are in need.

### **Methodology Guidelines**

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)

Y
