

Hospital Equity Measures Report

General Information

Report Type:	Hospital Equity Measures Report
Year:	2024
System Name:	University of California Health System
Principal Hospital Type:	General Acute Care Hospital
Associated Hospitals:	

Facility Name	Facility Type	HCAI ID	Address
UCSF BENIOFF CHILDREN'S HOSPITAL	Children Hospital	106010776	747 52ND STREET, OAKLAND, CA 94609
UNIVERSITY OF CALIFORNIA DAVIS MEDICAL CENTER	General Acute Care Hospital	106341006	2315 STOCKTON BOULEVARD, SACRAMENTO, CA 95817
LANGLEY PORTER PSYCHIATRIC INSTITUTE	Acute Psychiatric Hospital	106380046	1600 DIVISADERO STREET FLOOR 7, SAN FRANCISCO, CA 94143
UCSF MEDICAL CENTER AT MOUNT ZION	General Acute Care Hospital	106380895	1600 DIVISADERO STREET, SAN FRANCISCO, CA 94115
UCSF HEALTH SAINT FRANCIS HOSPITAL	General Acute Care Hospital	106380960	900 HYDE STREET, SAN FRANCISCO, CA
UCSF HEALTH - ST. MARY'S HOSPITAL	General Acute Care Hospital	106380965	450 STANYAN STREET, SAN FRANCISCO, CA 94117
UCSF MEDICAL CENTER	General Acute Care Hospital	106381154	505 PARNASSUS AVENUE, SAN FRANCISCO, CA 94143
UCSF MEDICAL CENTER AT MISSION BAY	General Acute Care Hospital	106384200	1975 4TH STREET, SAN FRANCISCO, CA 94158
UCI HEALTH-LAKEWOOD	General Acute Care Hospital	106190240	3700 SOUTH STREET, LAKEWOOD, CA 90712
SANTA MONICA - UCLA MEDICAL CENTER AND ORTHOPAEDIC HOSPITAL	General Acute Care Hospital	106190687	1250 16TH STREET, SANTA MONICA, CA 90404
RONALD REAGAN UCLA MEDICAL CENTER	General Acute Care Hospital	106190796	757 WESTWOOD PLAZA, LOS ANGELES, CA
UCLA WEST VALLEY MEDICAL CENTER	General Acute Care Hospital	106190859	7300 MEDICAL CENTER DRIVE, BLDG A, WEST HILLS, CA 91307
RESNICK NEUROPSYCHIATRIC HOSPITAL AT	Acute Psychiatric Hospital	106190930	150 Medical Plaza, LOS ANGELES, CA 90095
UCI HEALTH-FOUNTAIN VALLEY	General Acute Care Hospital	106301175	17100 EUCLID STREET, FOUNTAIN

Status:

Complete

Due Date:

12/01/2025

Last Updated:

03/04/2026

Hospital Web Address for Equity Report:

The individual reports will be on the UC hospital websites.

Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204

Hospital Equity Measures

Joint Commission Accreditation

General acute care hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:

<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce-health-care-disparities/>

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

Y

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/

unknown languages category.
1732085

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	1482804	1732085	84.9
Spanish Language	152893	1732085	9.0
Asian Pacific Islander Languages	60868	1732085	4.2
Middle Eastern Languages	838	1732085	0.7
American Sign Language	1166	1732085	0.1
Other Languages	18514	1732085	1.2

Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

General acute care hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:
<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN
101119

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission
261477

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs
38.7

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity	3693	3.7	139	1.4
Housing Instability	5022	5.0	5	0.0
Transportation Problems	3010	3.0	93	0.1
Utility Difficulties	1177	1.2	32	0.3
Interpersonal Safety	1629	1.6	0	0.0

Core Quality Measures for General Acute Care Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:
<https://hcahpsonline.org/en/survey-instruments/>

Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, general acute care hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

19357

Total number of respondents to HCAHPS Question 19

20881

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

92

Total number of people surveyed on HCAHPS Question 19

120262

Response rate, or the percentage of people who responded to HCAHPS Question 19

17

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					

Age	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					

Sex assigned at birth	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Male					
Unknown					

Payer Type	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Medicare					
Medicaid					
Private					
Self-Pay					
Other					

Preferred Language	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
English Language					
Spanish Language					
Asian Pacific Islander Languages					
Middle Eastern Languages					
American Sign Language					
Other/Unknown Languages					

Disability Status	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Does not have a disability					
Has a mobility disability					
Has a cognition disability					
Has a hearing disability					
Has a vision disability					
Has a self-care disability					
Has an independent living disability					

Sexual Orientation	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Lesbian, gay or homosexual					
Straight or heterosexual					
Bisexual					
Something else					
Don't know					
Not disclosed					

Gender Identity	Number of "probably yes" or "definitely yes" responses	Total number of responses	Percent of "probably yes" or "definitely yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Female					
Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Patient Received Information in Writing

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. General acute care hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the hospital?"

18047

Total number of respondents to HCAHPS Question 17

20881

Percentage of respondents who responded "yes" to HCAHPS Question 17

85

Total number of people surveyed on HCAHPS Question 17

120262

Response rate, or the percentage of people who responded to HCAHPS Question 17

17

Table 4. Patient reports receiving information in writing about symptoms or health problems by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
American Indian or Alaska Native					
Asian					
Black or African American					
Hispanic or Latino					
Middle Eastern or North African					
Multiracial and/or Multiethnic (two or more races)					
Native Hawaiian or Pacific Islander					
White					
Age	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)
Age < 18					
Age 18 to 34					
Age 35 to 49					
Age 50 to 64					
Age 65 Years and Older					
Sex assigned at birth	Number of "yes" responses	Total number of responses	Percentage of "yes" responses (%)	Total number of patients surveyed	Response rate of patients surveyed (%)

Female-to-male (FTM)/ transgender male/trans man					
Male					
Male-to-female (MTF)/ transgender female/trans woman					
Non-conforming gender					
Additional gender category or other					
Not disclosed					

Agency for Healthcare Research and Quality (AHRQ) Indicators

General acute care hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:
<https://qualityindicators.ahrq.gov/>

Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. General acute care hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:
https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission
517

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission
9332

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission
55.4

Table 5. Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of in-hospital deaths that meet the inclusion/exclusion criteria	Number of hospital discharges that meet the inclusion/exclusion criteria	Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%)
American Indian or Alaska Native			
Asian			
Black or African American			
Hispanic or Latino

Death Rate among Surgical Inpatients with Serious Treatable Complications

The Death Rate among Surgical Inpatients with Serious Treatable Complications is defined as the rate of in-hospital deaths per 1,000 surgical discharges among patients ages 18-89 years old or obstetric patients with serious treatable complications. General acute care hospitals report this measure by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Patient Safety Indicator is 04. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

https://qualityindicators.ahrq.gov/Downloads/Modules/PSI/V2023/TechSpecs/PSI_04_Death_Rate_among_Surgical_Inpatients_with_Serious_Treatable_Complications.pdf

Number of in-hospital deaths among patients aged 18-89 years old or obstetric patients with serious treatable complications

658

Total number of surgical discharges among patients aged 18-89 years old or obstetric patients

5021

Rate of in-hospital deaths per 1,000 surgical discharges, among patients aged 18-89 years old or obstetric patients with serious treatable complications

131.0

Table 6. Death Rate among Surgical Inpatients with Serious Treatable Complications by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of in-hospital deaths that meet the inclusion/exclusion criteria	Number of surgical discharges that meet the inclusion/exclusion criteria	Rate of in-hospital deaths per 1,000 hospital discharges that meet the inclusion/exclusion criteria (%)
American Indian or Alaska Native			
Asian			
Black or African American			
Hispanic or Latino			
Middle Eastern or North African			
Multiracial and/or Multiethnic (two or more)			
Native Hawaiian or Pacific Islander

California Maternal Quality Care Collaborative (CMQCC) Core Quality Measures

There are three core quality maternal measures adopted from the California Maternal Quality Care Collaborative (CMQCC).

CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate

The CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate is defined as nulliparous women with a term (at least 37 weeks gestation), singleton baby in a vertex position delivered by cesarian birth. General acute care hospitals report the NTSV Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cmqcc.org/quality-improvement-toolkits/supporting-vaginal-birth/ntsv-cesarean-birth-measure-specifications>

Number of NTSV patients with Cesarean deliveries

2950

Total number of nulliparous NTSV patients

14155

Rate of NTSV patients with Cesarean deliveries

0.2

Table 7. Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
American Indian or Alaska Native			
Asian			
Black or African American			
Hispanic or Latino			
Middle Eastern or North African			
Multiracial and/or Multiethnic (two or more races)			
Native Hawaiian or Pacific Islander			
White			

Age	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Age < 18			
Age 18 to 29			
Age 30 to 39			
Age 40 Years and Older			

Sex assigned at birth	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Female			
Male			
Unknown			

Payer Type	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Medicare			
Medicaid			
Private			
Self-Pay

Disability Status	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Does not have a disability			
Has a mobility disability			
Has a cognition disability			
Has a hearing disability			
Has a vision disability			
Has a self-care disability			
Has an independent living disability			

Sexual Orientation	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Lesbian, gay or homosexual			
Straight or heterosexual			
Bisexual			
Something else			
Don't know			
Not disclosed			

Gender Identity	Number of NTSV patients with cesarean deliveries	Total number of NTSV patients	Rate of NTSV patients with Cesarean deliveries (%)
Female			
Female-to-male (FTM)/transgender male/trans man			
Male			
Male-to-female (MTF)/transgender female/trans woman			
Non-conforming gender			
Additional gender category or other			
Not disclosed			

CMQCC Vaginal Birth After Cesarean (VBAC) Rate

The CMQCC Vaginal Birth After Cesarean (VBAC) Rate is defined as vaginal births per 1,000 deliveries by patients with previous Cesarean deliveries. General acute care hospitals report the VBAC Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The VBAC Rate uses the specifications of AHRQ Inpatient Quality Indicator 22. For more information, please visit the following link by copying and pasting the URL into your web browser:
[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_\(VBAC\)_Delivery_Rate_Uncomplicated.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_(VBAC)_Delivery_Rate_Uncomplicated.pdf)

Number of vaginal delivery among cases with previous Cesarean delivery that meet the inclusion and exclusion criteria

877

Total number of birth discharges with previous Cesarean delivery that meet the inclusion and exclusion criteria

3703

Rate of vaginal delivery per 1,000 deliveries by patients with previous Cesarean deliveries

236.8

CMQCC Exclusive Breast Milk Feeding Rate

The CMQCC Exclusive Breast Milk Feeding Rate is defined as the newborns per 100 who reached at least 37 weeks of gestation (or 3000g if gestational age is missing) who received breast milk exclusively during their stay at the hospital. Other criteria are that the newborns did not go to the neonatal intensive care unit (NICU), transfer, or die, did not reflect multiple gestation, and did not have codes for parenteral nutrition or galactosemia. General acute care hospitals report the Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The CMQCC Exclusive Breast Milk Feeding Rate uses the Joint Commission National Quality Measure PC-05. For more information, please visit the following link by copying and pasting the URL into your web browser: <https://manual.jointcommission.org/releases/TJC2024B/MIF0170.html>

Number of newborn cases that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

8009

Total number of newborn cases born in the hospital that meet the inclusion and exclusion criteria

10317

Rate of newborn cases per 100 that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate

General acute care hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf

HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate – Any Eligible Condition

Number of inpatient hospital admissions which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

32056

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

217481

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

14.7

Table 10. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate for any eligible condition by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

Race and/or Ethnicity	Number of inpatient readmissions	Total number of admitted patients	Readmission rate (%)
American Indian or Alaska Native			
Asian	3897	28230	13.8

Health Equity Plan

All general acute care hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 15. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio

Plan to address disparities identified in the data

University of California Health System have individual equity reports that identify strategies to address disparities.

You can find the reports here:

UCLA

• <http://www.uclahealth.org/community-equity>

UCD

• <http://www.vis.edu>

UCSF

• <http://www.ucsfhealth.org/>

UCI

• <http://www.ucihealth.org/>

Performance in the priority area

General acute care hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

Person-centered care

This highlights person-centered care strategies implemented across University of California Health system. The focus is on improving patient experience, communication, cultural responsiveness, and equity through structured programs and governance.

Common Themes Across UC Health System:

- Patient Voice: Advisory councils and feedback loops.
- Access: Interpreter services and multilingual education.
- Training: Bias awareness and trauma-informed care.
- Continuous Improvement: Data-driven governance and community partnerships.

These initiatives strengthen UC Health's commitment to equitable, patient-centered care, ensuring every patient receives care that is safe, respectful, and responsive to individual needs.

Patient safety

This highlights patient safety priorities and initiatives across University of California health system. The focus is on building a culture of safety, reducing preventable harm, and embedding equity into safety practices through governance, training, and continuous improvement.

Common Strategies Across UC System:

- Practices: Embedding resilience and accountability.
- Transparency: Dashboards and stratified reporting for equity.
- Training: Bias awareness, cultural competency, and safety protocols.
- Continuous Improvement: Governance oversight and feedback loops.

These initiatives position UC Health system as leaders in safe, equitable, and high-quality care, ensuring every patient receives care that is reliable, culturally responsive, and free from preventable harm.

Addressing patient social drivers of health

This summarizes SDOH screening and intervention strategies implemented across University of California Health system. These efforts aim to identify and address social risk factors—such as housing, food insecurity, transportation, utilities, and interpersonal safety—that significantly impact health outcomes and equity.

Common Strategies Across UC Systems

- Universal Screening: Embedded in EMR workflows for inpatient and outpatient settings.
- Referrals: Integration with community resource platforms and social work follow-up.
- Transparency: Dashboards for monitoring screening rates and outcomes.
- Workforce Development: Training on trauma-informed care and culturally responsive practices.
- Community Partnerships: Collaborations with local organizations to address social needs beyond hospital walls.

These initiatives advance UC Health’s commitment to equitable, whole-person care, reducing barriers to health and improving outcomes by addressing social determinants alongside clinical needs.

Performance in the priority area continued

Performance across all of the following priority areas.

Effective treatment

This outlines effective treatment strategies and performance related to effective treatment across University of California health systems. The focus is on improving clinical outcomes, reducing readmissions, and embedding equity into care delivery through governance, data-driven frameworks, and targeted interventions.

Common Strategies Across UC Systems

- **Performance Improvement:** Dashboards and equity analytics for performance monitoring.
- **Governance Structures:** Committees focused on quality, safety, and equity.
- **Risk-based care bundles and community partnerships.**
- **Access:** Interpreter services and multilingual education.
- **Health Equity:** Collaborative programs and culturally concordant care.

These initiatives position UC Health system as leaders in effective, equitable treatment, ensuring care that is safe, timely, and responsive to diverse patient needs.

Care coordination

This outlines care coordination strategies across University of California health systems. The focus is on ensuring safe transitions of care, reducing readmissions, and addressing social determinants of health (SDOH) through integrated models, technology, and community partnerships.

Common Strategies Across UC Systems

- **Care Teams:** Nurses, social workers, and community health workers.
- **Technology-Enabled Coordination:** Epic dashboards, automated outreach, and AI-driven tools.
- **Community Partnerships:** Collaborations with local organizations for transportation, housing, and food security.
- **Stratified data monitoring and culturally responsive care planning.**
- **Post-Discharge Support:** Telehealth clinics, health navigators, and automated follow-up.

These initiatives strengthen UC Health’s commitment to safe, equitable, and patient-centered care transitions, reducing preventable readmissions and improving health outcomes through collaboration, technology, and community engagement.

Access to care

This outlines strategies and initiatives across University of California health systems to improve access to care, focusing on timely appointments, equity-driven outreach, virtual care expansion, and community partnerships. These efforts aim to reduce barriers for underserved populations and ensure inclusive, patient-centered care.

Common Strategies Across UC Systems

- **Structure Growth:** New hospitals, outpatient centers, and mobile clinics.
- **Virtual Care Expansion:** Telehealth and digital tools for convenience and equity.
- **Community Engagement:** Mobile health programs, school-based initiatives, and partnerships with local organizations.
- **Access:** Interpreter services, culturally responsive care, and SDOH screening.
- **Performance Improvement:** Dashboards and analytics to monitor access gaps and outcomes.

These initiatives advance UC Health’s mission to provide timely, equitable, and comprehensive care, reducing structural barriers and improving health outcomes for diverse communities.

Methodology Guidelines

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)
